SUMMARY

HEC MONTRÉAL

WORD FROM THE RESEARCH DIRECTOR

Robert Gagné
Research Director

As the new research director of HEC Montréal, I am pleased to introduce the fall issue of *Research Flash*. I'd also like to take this opportunity to thank my predecessor, Jean-Claude Cosset, for six years of loyal service to the Research Office. As Jean-Claude returns to full-time teaching duties, I wish him the best luck and hope he enjoys his new-found "freedom."

As is customary, this issue of *Research Flash* highlights the research activities of HEC Montréal professors for the period from December 1, 2012 to May 31, 2013. This survey reveals the remarkable productivity of the School's professors in the field of research. For example, in 2012-2013, HEC Montréal professors published 260 articles in both scientific and professional peer-reviewed journals, including 13 journals appearing in the *Business Week*, *Financial Times* and *University of Texas at Dallas* ranking lists.

In addition to profiling the School's research activities, this issue presents the Research Office services, including its links to the Research Development and Technology Transfer Department.

I'd also like to take this opportunity to draw your attention to

the many development projects currently under way at the Research Office. These include the updating of the *Research Chair Management Policy*, the *Research Incentive Policy*, the *Strategic research plan* and the Research Office's website in order to better meet the needs of professors. We are also working toward implementing software to process cases brought before the Research Ethics Board. All of these changes should be deployed by the end of the current academic year (2013-2014).

I encourage you to contact me with any comments or suggestions you may have for improving research at HEC Montréal.

| RESEARCH DEVELOPMENT

ACTION RESEARCH AT HEC MONTRÉAL

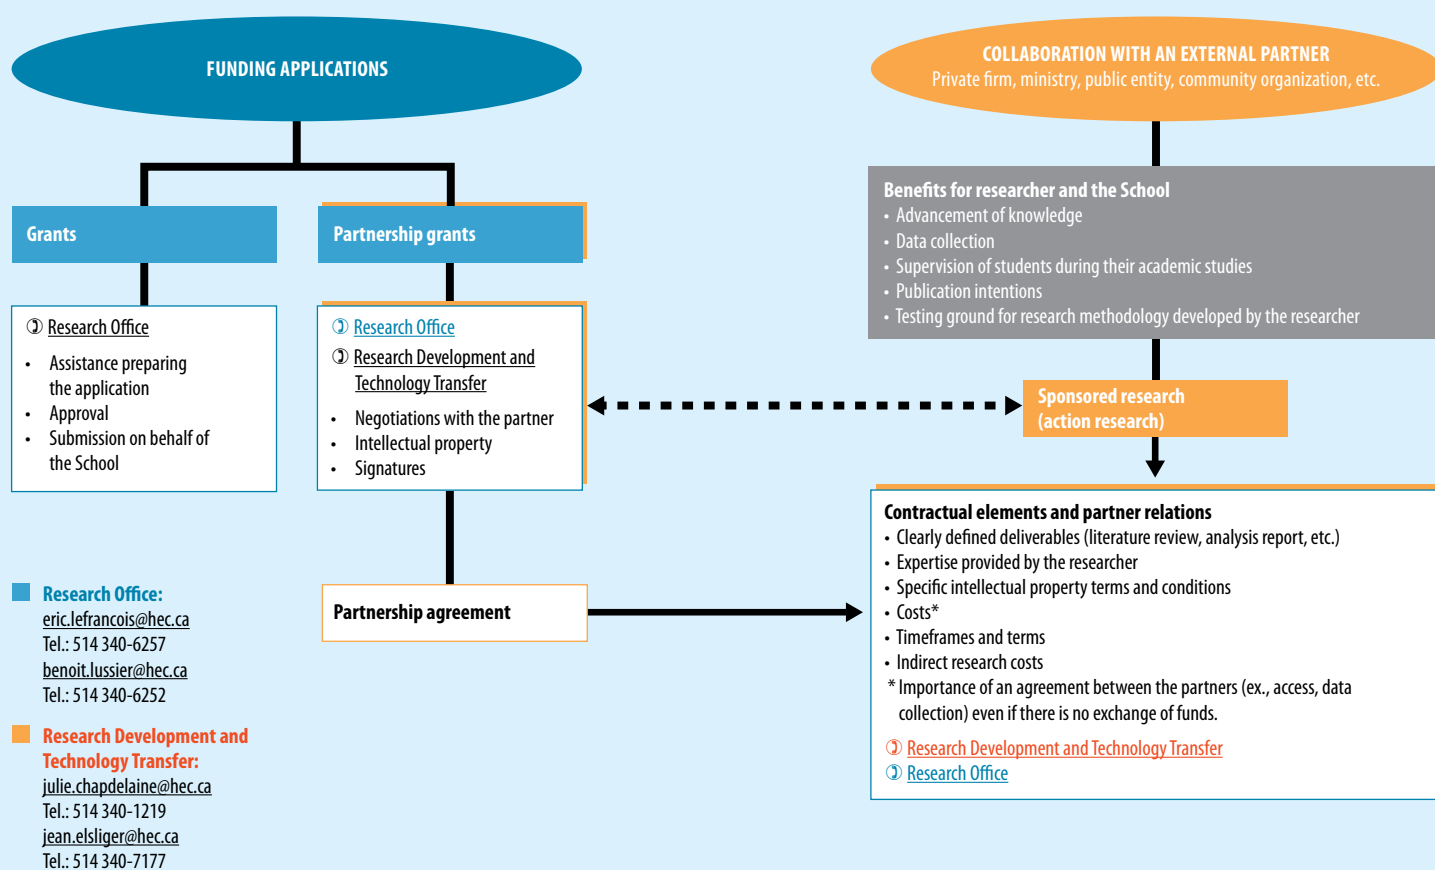

HEC Montréal's mission is to contribute to society's prosperity by providing leadership in all its spheres of activity, whether it be teaching, research or service to the community.

The mission of HEC Montréal's Research Development and Technology Transfer Department revolves around this third realm of activity. The Department supports all researchers by fostering synergy between the academic community and the private sector through collaborative research projects with industry partners. Last year, this commitment translated into over \$1,500,000 in action research. These agreements are administered jointly by the

Research Development and Technology Transfer Department and the Research Office. The graph below illustrates the collaboration between these two units by outlining the different interactions between them as well as their respective roles.
