**GENERAL INFORMATION**

This Parts Catalog is designed to help insure your ordering the correct replacement parts for servicing 1985 Renault Alliance vehicles. **IT IS NOT MEANT AS AN ASSEMBLY GUIDE.** Please refer to the appropriate Technical Service publication for disassembly, repair and reassembly procedures.

The Catalog is divided into ten basic sections, consisting of Plate Numbers as follows:

- 01 thru 09 .....General Information
- 10 thru 19 .....Engine
- 20 thru 29 .....Drive Train
- 30 thru 39 .....Mechanical Components
- 40 thru 49 .....Body Structure
- 50 thru 59 .....Body Components
- 60 thru 69 .....Climate Control
- 70 thru 79 .....Interior Trim
- 80 thru 89 .....Electrical Equipment
- 120 .....Numerical Index

The specific Plates appearing on each fiche are indicated on the colored band across the top of that fiche, and are also shown in the index at the top of this column.

Parts not listed for the specific vehicles included in this catalog are to be considered as **NOT SUPPLIED FOR SERVICE** by the American Motors Parts And Service Division.

Conventional accessories, such as radios, antennas and outside rear view mirrors are listed in a separate Accessory Reference Catalog. Serviceable components for these accessories **ARE** listed in this Parts Catalog.

Suggested prices for all parts listed in this Parts Catalog can be found in a separate Dealer Parts and Accessories Price List.

The Dealer Parts and Accessories Price List will list substitution information when stock has been depleted at both the Milwaukee National Parts Distribution Center and **ALL** Zone warehouses.

Substituting parts will automatically be supplied when the original part number is ordered even though the Parts and Accessories Price List may not show the substitution.

Ornamentation changes and other modifications, deletions or additions to original equipment made by owners or dealers to satisfy individual owner preference are not listed in this Parts Catalog. The owner or dealer assumes the responsibility for these items.

Bulk paint is not available from the factory. However, aerosol or brush top touchup paint is listed in the Accessory Reference Catalog, Technical Notes or Technical Service Bulletins. All colors shown are available from your local Ditzler or Dupont paint jobber by requesting the intermix formula.

Weights and measures are in metric units unless otherwise specified. Dimensions without symbols are in millimeters.

61 Shock Absorbers should be changed in axle pairs.

**62 CERTIFICATION NOTE:**

All sound modifying devices listed within this Catalog, and which are included in the current Parts Price List as being available through American Motors Corporation Parts and Service Division, are certified to comply with the Exhaust System Certification Regulations contained in Title 13, California Administrative Code, Sections 1050 through 1054, for use on vehicles for which they are listed.

63 Key code **MUST BE SUPPLIED** when ordering coded Key.

64 The replacement Coolant Temperature Sending Unit **MAY** have a screw type Terminal end, in contrast with the blade type Terminal end on the original equipment Sending Unit. Consequently, it **MAY** be necessary to use Adapter 08 54 430 000 to connect the blade type Wiring Harness to the screw type replacement Sending Unit.

65 Receiver code **MUST BE SUPPLIED** when ordering Transmitter.

66 This part is a service replacement for **SEVERAL** alternative original equipment parts.

67 Order new Part Number same as appears on part being replaced.

69 On some 1.7 Liter (F3N) Engines built early in model year 1985, different styles of Intake Manifold and Fuel Supply Tube were used. If an interference problem exists between these parts and the replacement Exhaust Manifold, the required clearance can be provided by removing a small amount of material from the Intake Manifold and by either

1. re-shaping the Fuel Supply Tube, or
2. replacing the Fuel Supply Tube with the revised Tube, Part Number 89 33 003 046.

70 Please refer to the current Accessory Reference Catalog for this item. Only the serviceable components of accessory items are included in this Parts Catalog.

71 On some early versions of the 1985 model year 1.7 Liter (F3N) Engine, a unique engine block was used. This required the installation of a modified Starting Motor to provide adequate starter-to-engine block clearance. This modification involved grinding a Flat on the outside of the starter field housing (at the position nearest the engine block). Identification of this starter can also be verified by a daub of green paint on the starter drive housing. The part number of the modified starter is 89 83 502 266. If the starter being replaced is **NOT** of the modified style, check remaining catalog part number listings for applicable starter.

72 Used on vehicles with microprocessor Part Number 89 33 001 785 or 89 33 001 786.

73 Used on vehicles with microprocessor Part Number 89 33 002 505 or 89 33 002 506.

**ALLIANCE Systems Sentry**

To use Systems Sentry, follow this procedure:

1. Drive your vehicle until the engine is at normal operating temperature.
2. Park your vehicle on level surface.
3. Turn the ignition switch to OFF.
4. Observe the Systems Sentry display.

The amber checking light indicates that the systems are being checked.  
A green light indicates that the fluid levels or brake pads are OK.  
A red light indicates that systems should be checked.  
Refer to the service and Maintenance section of the owners manual.

**WARNING**  
Systems Sentry readings are accurate only when both engine and transaxle are fully warm. When cold red lights may appear when no problem actually exists.  
Check your owners manual for complete information.

**CHILD PROTECTOR**

This door will not open from the inside when the child protector is in the lock position (see rear edge of door). To open, release inside lock and use outside handle.
