GATT BIBLIOGRAPHYForeword

The GATT BIBLIOGRAPHY was first published in March 1954. It lists books, pamphlets, articles in periodicals, newspaper reports and editorials (including texts of lectures which refer to the General Agreement on Tariffs and Trade), as well as the titles of Press Releases issued by the GATT secretariat in 1969. The purpose of the list is to provide sources of reference for historians, researchers and students on the operation of the GATT. It should be noted, however, that the publications prepared by the GATT secretariat are not included. These are contained in the Publications List issued every year by the Information and Library Service of the GATT secretariat, and obtainable on request, free of charge.

Clippings available for consultation. References to the sources quoted in this Bibliography may be consulted at the library of the GATT secretariat, up to two years after the date of publication. One photocopy of an individual clipping can be provided, free of charge.

The Bibliography is divided into a chronological listing of references to the GATT, grouped in alphabetical order month after month, during the period under review. The sixteen volumes are available as follows:
