

The Everyday Edited By Stephen Johnstone

Rosemary Shirley

The Everyday Stephen Johnstone, 2008 Writings on the turn to the ordinary in contemporary art examine the various ways artists have engaged with the everyday since 1945.

The Everyday Stephen Johnstone, 2008 This anthology surveys the everyday's central significance for art since the 1950s. The Everyday is one of a series documenting major themes and ideas in contemporary art. --Book Jacket.

Appropriation David Evans, 2009 Many influential artists today draw on a legacy of 'stealing' images and forms from other makers. The term appropriation is particularly associated with the 'Pictures' generation, centred [sic] on New York in the 1980s; this anthology provides a far wider context. Historically, it reappraises a diverse lineage of precedents - from the Dadaist readymade to Situationist détournement - while contemporary 'art after appropriation' is considered from multiple perspectives within a global context. --back cover.

Tokyo Vernacular Jordan Sand, 2013-07-13 Preserved buildings and historic districts, museums and reconstructions have become an important part of the landscape of cities around the world. Beginning in the 1970s, Tokyo participated in this trend. However, repeated destruction and rapid redevelopment left the city with little building stock of recognized historical value. Late twentieth-century Tokyo thus presents an illuminating case of the emergence of a new sense of history in the city's physical environment, since it required both a shift in perceptions of value and a search for history in the margins and interstices of a rapidly modernizing cityscape. Scholarship to date has tended to view historicism in the postindustrial context as either a genuine response to loss, or as a cynical commodification of the past. The historical process of Tokyo's historicization suggests other interpretations. Moving from the politics of the public square to the invention of neighborhood community, to oddities found and appropriated in the streets, to the consecration of everyday scenes and artifacts as heritage in museums, Tokyo Vernacular traces the rediscovery of the past—sometimes in unlikely forms—in a city with few traditional landmarks. Tokyo's rediscovered past was mobilized as part of a new politics of the everyday after the failure of mass politics in the 1960s. Rather than conceiving the city as national center and claiming public space as national citizens, the post-1960s generation came to value the local places and things that embodied the vernacular language of the city, and to seek what could be claimed as common property outside the spaces of corporate capitalism and the state.

Half Sound, Half Philosophy Jing Wang,2021-01-14 From the late 1990s until today, China's sound practice has been developing in an increasingly globalized socio-political-aesthetic milieu, receiving attentions and investments from the art world, music industry and cultural institutes, with nevertheless, its unique acoustic philosophy remaining silent. This book traces the history of sound practice from contemporary Chinese visual art back in the 1980s, to electronic music, which was introduced as a target of critique in the 1950s, to electronic instrument building fever in the late 1970s and early 1980s, and to the origins of both academic and nonacademic electronic and experimental music activities. This expansive tracing of sound in the arts resonates with another goal of this book, to understand sound and its artistic practice through notions informed by Chinese qi-cosmology and qi-philosophy, including notions of resonance, shanshui (mountains-waters), huanghu (elusiveness and evasiveness), and distributed monumentality and anti-monumentality. By turning back to deep history to learn about the meaning and function of sound and listening in ancient China, the book offers a refreshing understanding of the British sinologist Joseph Needham's statement that "Chinese acoustics is acoustics of qi." and expands existing conceptualization of sound art and contemporary music at large.

The Taste of Art Silvia Bottinelli,Margherita d'Ayala Valva,2017-06-01 The Taste of Art offers a sample of scholarly essays that examine the role of food in Western contemporary art practices. The contributors are scholars from a range of disciplines, including art history, philosophy, film studies, and history. As a whole, the volume illustrates how artists engage with food as matter and process in order to explore alternative aesthetic strategies and indicate countercultural shifts in society. The collection opens by exploring the theoretical intersections of art and food, food art's historical root in Futurism,

and the ways in which food carries gendered meaning in popular film. Subsequent sections analyze the ways in which artists challenge mainstream ideas through food in a variety of scenarios. Beginning from a focus on the body and subjectivity, the authors zoom out to look at the domestic sphere, and finally the public sphere. Here are essays that study a range of artists including, among others, Filippo Tommaso Marinetti, Daniel Spoerri, Dieter Roth, Joseph Beuys, Al Ruppertsberg, Alison Knowles, Martha Rosler, Robin Weltsch, Vicki Hodgetts, Paul McCarthy, Luciano Fabro, Carrie Mae Weems, Peter Fischli and David Weiss, Janine Antoni, Elżbieta Jabłońska, Liza Lou, Tom Marioni, Rirkrit Tiravanija, Michael Rakowitz, and Natalie Jeremijenko.

Collective and Collaborative Drawing in Contemporary Practice Helen Gørrill, Jill Journeaux, 2018-01-23 Whilst both collective and collaborative drawing is being widely explored internationally, both within and beyond educational institutions, there is surprisingly little serious research published on the topic. This realisation led to the first international Drawing Conversations Symposium, accompanied by the Drawn Conversations Exhibition at Coventry University, UK, in December 2015. The two events drew a strong and global response, and brought together a wide range of participants, including academics, artists, researchers, designers, architects and doctoral students. This book considers what happens, and how, when people draw together either in the form of a collaboration, or through a collective process. The contributions here serve to establish the field of collective and collaborative drawing as distinct from the types of drawing undertaken by artists, designers, and architects within a professional context. The volume covers conversations through the act of drawing, collaborative drawing, drawing communities, and alternative drawing collaborations.

Artist-Parents in Contemporary Art Barbara Kutis, 2020-05-14 This book examines the increasing intersections of art and parenting from the late 1990s to the early 2010s, when constructions of masculine and feminine identities, as well as the structure of the family, underwent radical change. Barbara Kutis asserts that the championing of the simultaneous linkage of art and parenting by contemporary artists reflects a conscientious self-fashioning of a new kind of identity, one that she calls the 'artist-parent.' By examining the work of three artists—Guy Ben-Ner, Elżbieta Jabłońska, and the collective Mothers and Fathers— this book reveals how these artists have engaged with the domestic and personal in order to articulate larger issues of parenting in contemporary life. This book will be of interest to scholars in art and gender, gender studies, contemporary art, and art history.

Extra Life Steven Johnson, 2021-05-11 "Offers a useful reminder of the role of modern science in fundamentally transforming all of our lives." —President Barack Obama (on Twitter) "An important book." —Steven Pinker, The New York Times Book Review The surprising and important story of how humans gained what amounts to an extra life, from the bestselling author of *How We Got to Now* and *Where Good Ideas Come From* In 1920, at the end of the last major pandemic, global life expectancy was just over forty years. Today, in many parts of the world, human beings can expect to live more

than eighty years. As a species we have doubled our life expectancy in just one century. There are few measures of human progress more astonishing than this increased longevity. *Extra Life* is Steven Johnson's attempt to understand where that progress came from, telling the epic story of one of humanity's greatest achievements. How many of those extra years came from vaccines, or the decrease in famines, or seatbelts? What are the forces that now keep us alive longer? Behind each breakthrough lies an inspiring story of cooperative innovation, of brilliant thinkers bolstered by strong systems of public support and collaborative networks, and of dedicated activists fighting for meaningful reform. But for all its focus on positive change, this book is also a reminder that meaningful gaps in life expectancy still exist, and that new threats loom on the horizon, as the COVID-19 pandemic has made clear. How do we avoid decreases in life expectancy as our public health systems face unprecedented challenges? What current technologies or interventions that could reduce the impact of future crises are we somehow ignoring? A study in how meaningful change happens in society, *Extra Life* celebrates the enduring power of common goals and public resources, and the heroes of public health and medicine too often ignored in popular accounts of our history. This is the sweeping story of a revolution with immense public and personal consequences: the doubling of the human life span.

Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics, experimental art, and urban design. For Willats, a cluster of concepts about control and feedback within living and machine systems (cybernetics) offered a new means to make art relevant. For decades, Willats has built relationships through art with people in tower blocks, underground clubs, middle-class enclaves, and warehouses on the Isle of Dogs, to investigate their current conditions and future possibilities. Sharon Irish's study demonstrates the power of Willats's multi-media art to catalyze communication among participants and to upend ideas about "audience" and "art." Here, Irish argues that it is artists like Willats who are now the instigators of social transformation.

Rural Modernity, Everyday Life and Visual Culture Rosemary Shirley, 2016-03-03 Through the lens of the everyday, this book explores 'the countryside' as an inhabited and practised realm with lived rhythms and routines. It relocates the topography of everyday life from its habitually urban focus, out into the English countryside. The rural is often portrayed as existing outside of modernity, or as its passive victim. Here, the rural is recast as an active and complex site of modernity, a shift which contributes alternative ways of thinking the rural and a new perspective on the everyday. In each chapter, pieces of visual culture - including scrapbooks, art works, adverts, photographs and films - are presented as tools of analysis which articulate how aspects of the everyday might operate differently in non-metropolitan places. The book features new readings of the work of significant artists and photographers, such as Jeremy Deller and Alan Kane, Stephen Willats, Anna Fox, Andrew Cross, Tony Ray Jones and Homer Sykes, seen through this rural lens, together with analysis of visually fascinating

archival materials including early Shell Guides and rarely seen scrapbooks made by the Women's Institute. Combining everyday life, rural modernity and visual cultures, this book is able to uncover new and different stories about the English countryside and contribute significantly to current thinking on everyday life, rural geographies and visual cultures.

Everyday Fashion Bethan Bide, Jade Halbert, Liz Tregenza, 2023-12-28 Ordinary clothes have extraordinary stories. In contrast to academic and curatorial focus on the spectacular and the luxurious, *Everyday Fashion* makes the case that your grandmother's wardrobe is an archive as interesting and important as any museum store. From the moment we wake and get dressed in the morning until we get undressed again in the evening, fashion is a central medium through which we experience the world and negotiate our place within it. Because of this, the ways that supposedly 'ordinary' and 'everyday' fashion objects have been designed, manufactured, worn, cared for, and remembered matters deeply to our historical understanding. Beginning at 1550 □ the start of an era during which the word 'fashion' came to mean stylistic change rather than the act of making □ each chapter explores the definition of everyday fashion and how this has changed over time, demonstrating innovative methodologies for researching the everyday. The variety and significance of everyday fashion cultures are further highlighted by a series of illustrated object biographies written by Britain's leading fashion curators, showcasing the rich diversity of everyday fashion in British museum collections. Collectively, this volume scratches below the

glossy surface of fashion to expose the mechanics of fashion business, the hidden world of the workroom and the diversity and role of makers; and the experiences of consuming, wearing, and caring for ordinary clothes in the United Kingdom from the 16th century to the present day. In doing so it challenges readers to rethink how fashion systems evolve and to reassess the boundaries between fashion and dress scholarship.

The Past is the Present; It's the Future Too Christine Ross,2012-06-28 The term 'temporality' often refers to the traditional mode of the way time is: a linear procession of past, present and future. As philosophers will note, this is not always the case. Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of contemporary art: films, video installations, sculpture and performance works. Ross first provides an interdisciplinary overview of contemporary studies on time, focusing on findings in philosophy, psychology, sociology, communications, history, postcolonial studies, and ecology. She then illustrates how contemporary artistic practices play around with what we consider linear time. Engaging the work of artists such as Guido van der Werve, Melik Ohanian, Harun Farocki, and Stan Douglas, allows investigation through the art, as opposed to having art taking an ancillary role. *The Past is the Present; It's the Future Too* forces the reader to understand the complexities of the significance of temporal development in new artistic practices.

The Extraordinary in the Ordinary: The Aesthetics of Everyday Life Thomas Leddy,2012-02-07 This book explores the aesthetics of the objects and environments we encounter in daily life. Thomas Leddy stresses the close relationship between everyday aesthetics and the aesthetics of art, but places special emphasis on neglected aesthetic terms such as 'neat,' 'messy,' 'pretty,' 'lovely,' 'cute,' and 'pleasant.' The author advances a general theory of aesthetic experience that can account for our appreciation of art, nature, and the everyday.

Henri Lefebvre, Boredom, and Everyday Life Patrick Gamsby,2022-09-23 This book assembles the fragments of Henri Lefebvre's unrealized sociology of boredom and explores the sociohistorical and spatial conditions and contradictions of boredom and everyday life in the modern world.
