INTRODUCTION

This new presentation was conceived for the purpose of guiding and facilitating research by those who make use of the Department's publications, whether the geological maps or other published works. Reports pertaining to mines have been assembled in chronological order up to 1937, and then in numerical order.

The catalogue comes in two parts: the first comprises four chapters, namely 1) Mines; 2) New Quebec; 3) Waters, and 4) Maps; the second part is subdivided into four sections, alphabetically indexed according to a) Authors, b) Areas, c) Substances and d) Miscellany. The following is the complete edition of the catalogue.
