QUÉBEC
1968

Avant-propos

La bibliographie sur les minéraux lourds présentée ici, comprend à très peu d'exceptions tous les articles importants parus sur le sujet, depuis 1950. Les références incluses traitent donc de la séparation des minéraux lourds, de leur identification et minéralogie, ainsi que de leur provenance. Quant aux articles parus avant 1950, nous n'avons énuméré que les plus importants. On peut d'ailleurs trouver mention des autres articles parus avant 1950 dans les plus importants parus depuis, par ex. Hutton, 1950. Nous y avons ajouté quelques références sur les sables ferrifères de la province de Québec.

Nous voulons remercier le professeur Gaston Pouliot, de l'Ecole Polytechnique, qui a suggéré quelques titres.

Foreword

The list of references presented here includes, with very few exceptions, all the important articles dealing with heavy minerals, that have appeared since 1950. Those references cover heavy minerals separation, their identification and mineralogy as well as their provenance.

As for the articles that appeared before 1950, only the more important have been listed. The other articles that appeared before 1950 may be found in the more comprehensive ones that have been published since, e.g. Hutton, 1950. We have added a few references dealing with the iron sands of the province of Quebec.

We are grateful to Professor Gaston Pouliot, of the Ecole Polytechnique, who has suggested a few titles.
