Introduction

Statistics South Africa, on behalf of the Republic of South Africa, will host the 28th International Population Conference at the Cape Town International Conference Centre (CTICC) from 29 October to 4 November 2017.

The Conference will open on Sunday 29 October and conclude on Friday 3 November with side meetings on Saturday 28 October and 4 November 2017. The scientific programme includes over 1, 600 scientific communications presented in 240 scientific and plenary sessions and in 62 thematic poster sessions, as well as training sessions, side meetings and exhibitions.

The General Assembly of IUSSP members will be held in two meetings. A short meeting of the General Assembly will take place on Monday 30 October, 1:00 to 1:30 pm in Ballroom West where members will designate a committee to review the proposed amendments to the IUSSP Constitution. The main IUSSP General Assembly will take place on Wednesday 1 November at 7 pm in Ballroom West.

The South African National Organising Committee (NOC) has organized an Africa Day, which includes seven sessions that were part of the Call for papers, as well as a special invited opening session that will take place on 31 October in Auditorium 2. The Africa Day Plenary on Demographic data challenges for reporting on the Sustainable Development Goals in Africa will take place on 1 November in Auditorium 2. The Africa day sessions focus on issues of importance to Africa and the Southern Africa region covering demographic trends in the region as well as focusing on specific population and policy challenges: achieving the Demographic Dividend, providing education and employment for Africa's youth, and collecting and analyzing the demographic data required to evaluate progress towards meeting the continent's development goals. In addition to the Africa Day sessions, there are sessions throughout the week in the regular programme that feature research from the continent. The NOC will organize a gala event for all delegates on the evening of Thursday 2 November.

The International Organising Committee (IOC) and the NOC gratefully acknowledge the many people who volunteered their time and expertise to develop this Conference. The IOC is particularly grateful to the theme conveners and organizers of scientific sessions, to the reviewers who assisted in vetting the abstracts received in response to the call for papers, and to the thousands of scholars worldwide who showed an interest in the Conference by submitting paper abstracts and preparing scientific papers and posters.

Introduction

Statistics South Africa, sous l'égide de la République d'Afrique du sud, accueille le XXVIII^e Congrès international de la population au Centre de conférences internationales du Cap (CTICC) du 29 octobre au 4 novembre 2017.

Le Congrès débutera le dimanche 29 octobre 2017 et s'achèvera le vendredi 3 novembre 2017. Des séances parallèles se tiendront les samedi 28 octobre et 4 novembre. Le programme scientifique comprend plus de 1 600 communications réparties dans 240 séances plénières et régulières, et 62 séances posters thématiques, ainsi que des sessions de formation, des réunions parallèles et des stands d'exposition.

L'Assemblée générale des membres de l'UIESP se tiendra en deux réunions. Une courte réunion se tiendra le lundi 30 octobre de 13h à 13h30 dans la salle Ballroom West, pour désigner le comité de révision des amendements aux statuts de l'UIESP proposés. L'Assemblée générale principale se tiendra le mercredi 1^{er} novembre à 19h dans la salle Ballroom West.

Le Comité national d'organisation (CNO) sud-africain a organisé une Journée Afrique, qui comprend sept séances incluses dans l'appel à communications ainsi qu'une séance invitée d'ouverture, qui se tiendra le 31 octobre dans l'Auditorium 2. La séance plénière de la Journée Afrique « Les défis posés par le besoin de données démographiques pour suivre l'avancement des Objectifs de développement durable en Afrique » se tiendra le 1^{er} novembre dans l'Auditorium 2. L'ensemble de ces séances portent sur des questions cruciales pour l'Afrique, et plus particulièrement l'Afrique australe, couvrant aussi bien les tendances démographiques que les enjeux spécifiques en matière de population et de politiques : réalisation du dividende démographique, accès à l'éducation et à l'emploi pour les jeunes, collecte et analyse des données démographiques nécessaires à l'évaluation des progrès vers les objectifs de développement du continent. En plus des séances spécifiques de la Journée Afrique, nombre de séances dans le programme général seront consacrées tout au long de la semaine à des recherches portant sur le continent africain. Enfin le CNO invite tous les participants au Congrès à un dîner de gala le jeudi 2 novembre au soir.

Le Comité international d'organisation (CIO) et le CNO remercient chaleureusement toutes les personnes qui ont bénévolement consacré leur temps et leur expertise pour réaliser ce congrès. Le CIO est particulièrement reconnaissant envers les responsables de thèmes, les organisateurs des séances scientifiques, les évaluateurs qui ont procédé à la sélection des résumés soumis en réponse à l'appel à communications ainsi qu'aux milliers de chercheurs qui, de par le monde, ont manifesté leur intérêt pour ce congrès en soumettant des résumés et en préparant des communications scientifiques et des posters.

Message from the President of the International Organising Committee /
Message du Président du Comité international d'organisation

Spurred on by interesting innuendos in Africa's population dynamics in the past 10-15 years, as its economies grow steadily above the global average with little benefit from this growth, Statistics South Africa (Stats SA) sought to bring discussions closer home on key issues of population and development in bidding to host the 28th International Population Conference (IPC) of the International Union of the Scientific Study of Population (IUSSP) in 2017.

It is an honour therefore, as the President of the International Organising Committee (IOC) of the IPC and as the Statistician-General of the Republic of South Africa (RSA) to invite you to the 28th IPC in Cape Town, from 29 October to 4 November 2017. A conference that dates back to the early 20th century, will be hosted in southern Africa for the first time, at a time when the complex relationships on population and sustainable development are being played out on a continent and region witnessing population increases unprecedented in history.

Population is not simply a problem of numbers. The growth in Africa's population in the last decade has not been accompanied by the necessary structural transformation nor has it translated into equitable human development and improved livelihoods. Nearly 50 per cent of Africans still live in poverty even though countries are becoming richer. We are confronted with a global, an African and a South African contemporary population crisis insofar as the population situation in many African countries continues to contribute to or detract from their chances of realising the goals of development, not only for the current generation but also for future generations. Conversely, we still ask the question how does development affect population growth?

These together with data issues and data holdings through various data collection vehicles, namely population and housing censuses, labour force surveys and demographic health surveys, and civil registration and vital statistics to name a few, policy analysis and debates on current trends force us to revisit basic questions we have always asked over time:

1. Will developing countries be capable of improving the levels of living for their people with the current and anticipated levels of population growth?
2. With increasing unemployment, how will African countries be able to cope with the vast increases in their labour forces over the coming decades? Will employment patterns and transitions reflect population trends?
3. The problem of poverty alleviation: What are the implications of higher population growth rates among the world's poor for their chances of overcoming the human misery of absolute poverty? Will world food supply and its distribution be sufficient not only to meet the anticipated population increase in the coming decades but also to improve nutritional levels to the point where all humans can have an adequate diet?

4. Improvement in health and education: Given the anticipated population growth will African countries be able to extend the coverage and improve the quality of their health and educational systems so that everyone can at least have the chance to secure adequate health care and basic education?

5. Poverty and the freedom of choice: To what extent are the low levels of living an important factor in limiting the freedom of parents to choose a desired family size? Is there a relationship between poverty and family size? In view of these and other questions, we anticipate the 28th IPC in 2017 to frame the discussions of a convergence of experts to a little more than simply that of numbers, or densities, or rates, or movements, but with full consideration of the qualities of human life: prosperity in place of poverty, education in place of illiteracy, full opportunities for the next generations of children in place of current limitations and how we duly re-look at our population policies as a collective.

It is in this light, that I look forward to welcoming you all to the City of Cape Town in October 2017 to share ideas as you also take time to enjoy the best of Cape Town.

Dr Pali Lehohla, Statistician-General of South Africa
