Metodi per la formazione

Una guida completa alle metodologie formative, che pone in rilievo quanto di originale e innovativo è stato elaborato in questo campo negli ultimi anni. Dallo story telling al teatro di formazione, dall'uso della metafora al gioco, dall'autoapprendimento alla rete, dalle comunità di pratica alla tutorship, dal metodo autobiografico al social dreaming, un'indispensabile rassegna di quanto costituisce l'arte della formazione.

Saggi di: Duccio Demetrio, Dante Bellamio, Giuseppe Varchetta, Alberto Munari, Enzo Spaltro, Giovanni Moretti, Donata Fabbri, Michael Colgrass, Maria Grazia Riva, Domenico Lipari, Claudia Piccardo, Filippo Pellicoro, Carmela Covato, Chiara Ghislieri, Lorenzo Tesio, Andrea Fontana, Elisabetta Biffi, Pier Luigi Amietta, Franco Angeli, Enrico Auteri, Roberto Barabino, Massimo Brusciaglioni, Piersergio Caltabiano, Gianfranco Gambigliani Zoccoli, Micaela Castiglioni

Scritture d'amore

Di che cosa si scrive, quando si scrive d'amore? Di molti soggetti e oggetti diversi, come sono diverse le sensibilità, i contesti, i modi di scrivere e di amare. Saggi di Barbara Mapelli, Silvia Vegetti Finzi, Vanna Iori, Maria Grazia Riva, Carmela Covato, Alberto Bellocchio, Paolo Jedlowski, Lea Melandri, Stefano Ciccone.

Sacro e profano

Interrogarsi sul perché della fede, del dubbio, del non credere è una delle condizioni dell'essere adulto: non negare la possibilità che il sacro irrompa nella nostra vita, ma al tempo stesso essere consapevoli del "coraggio" dell'ateismo.

Saggi di Duccio Demetrio, Fulvio Papi, Salvatore Natoli, Ivano Gamelli, Romano Madera, Enzo Bianchi, Yahya Sergio, Yahe Pallavicini, Laura Formenti, Piero Coda, Fulvio Carmagnola, Telmo Pievani, Margherita Hack, Barbara Mapelli, Mariangela Giusti.

Où va le psychodrame analytique ?

Il y a une quarante ans, rares étaient les pionniers du psychodrame psychanalytique. Les tenants de la cure pure et dure leur trouvaient un doux parfum de séduction, masque de celui du soufre et de la perte d'âme. De nos jours, le soupçon porte sur la crainte de l'infiltration de l'acting de parole dans la cure. Le psychodrame analytique s'est répandu et cela à un point tel que dans une tentative de recension l'association Figures psychodramatiques, éditrice d'un annuaire ad hoc, a dû renoncer à toute exhaustivité.

Pourtant, un regroupement se fait, par affinités analytiques dans la reconnaissance mutuelle de cette authenticité analytique qui permet de prendre le risque de traiter des patients border line ou psychotiques : ceux pour lesquels une cure de divan serait une aventure trop longue ou vaine, voire dangereuse. Patients de tous âges pris par le manque à être et la désobjectivation dans un vécu douloureux de malaise peu défini. La désymbolisation les habite.

Le psychodrame analytique fait appel au groupe, au corps et au jeu pour donner conflictuellement et transférentiellement le statut de représentation à ce qui ne serait que figuration de surface. Une meilleure prise en compte des états-limites peut être une raison de son expansion ? Mais il est à craindre que des dérives productivistes ne soient aussi en cause ; cinq ou six patients et deux thérapeutes, "ça fait des actes". Et qui sait si d'aucuns ne s'en trouveront pas psychanalystes à bon compte ?

Le dossier présenté dans ce numéro a fait appel à des analystes expérimentés. Puisse leur statut d'analystes "généralistes" être une garantie de prudence dans le domaine qu'ils exposent.

Brigitte Longerich

Une démarche fondée sur le dialogue et l'équité

Face à l'augmentation des situations conflictuelles dans le domaine de la santé, le canton de Vaud a ouvert récemment un bureau de médiation, dont la responsable est une infirmière.

Nathalie Bovey

Un nouveau défi pour les EMS

L'espérance de vie des patients séropositifs a nettement augmenté depuis l'apparition des tri-thérapies. Certains d'entre eux arrivent aujourd'hui en EMS, une situation nouvelle suscitant des interrogations.

Annie Oulevey Bachmann, Blaise Guinchar

Comment apprend-on une profession « invisible » ?

La profession d'infirmière perçue et commentée par les étudiants de la Haute école de santé La Source.

Brigitte Longerich

La recherche : entre engouement et doutes

Nécessité absolue pour certains, investissement superflu pour d'autres, la recherche en soins infirmiers pose des défis. Une journée a été consacrée à cette question à Fribourg.

Lucien Portenier, Pierre Théraulaz

Les soins infirmiers en marche

Connaissances, innovation et vitalité ont été les maîtres-mots du récent congrès du CII à Taiwan.

Cure infirmieristiche, no 9, 2005

Brigitte Longerich

Un animal pour adoucir le quotidien

La zoothérapie fait timidement son entrée en Europe. Résidents des EMS, enfants, adolescents marginalisés, personnes handicapées et patients psychiques peuvent tirer un grand bénéfice de la présence d'un animal. .

Béatrice Fonjallaz, Marie-José Walter

Des vacances adaptées aux besoins des enfants

Les maladies rhumatismales de l'enfant sont peu connues, et pourtant, elles sont invalidantes ! Une colonie de vacances d'un type particulier a été proposée aux jeunes malades.

Brigitte Longerich

Les limites de l'autonomie

Dans les centres de traitement et de réhabilitation, la question de l'autonomie du patient est au centre du débat, occasionnant régulièrement des dilemmes éthiques.

Brigitte Longerich

Une offre unique pour la Suisse latine

Né de la fusion entre H+ Formation, le CREP et l'IRSP, Espace compétences offrira une palette variée de formations aux collaborateurs du secteur socio-sanitaire.

Pierre-André Wagner

Une victoire sur la discrimination

Au terme d'une longue bataille juridique, les soins psychiatriques ambulatoires sont reconnus comme une prestation de base. Rappel des faits.

Elsbeth Wandeler

Pas d'invasion de l'Est

L'extension de la libre circulation des personnes qui ne provoquera pas un afflux d'infirmières au rabais.

Cure infirmieristiche, no 10, 2005

Claude Laville

Un monde où technicité et humanité vont de pair

Les infirmiers en anesthésie ne sont pas que d'habiles techniciens. Au quotidien, la rencontre avec le patient est prioritaire.

François Magnin

Les soins post-interventionnels et l'antalgie aiguë

En salle de réveil et dans le traitement de la douleur, l'infirmier-anesthésiste joue un rôle important.

Julio Burillo

Le service de garde

Dans les situations d'urgence aussi, les compétences de l'infirmier-anesthésiste sont requises.

Paulette Le Lous, Sophie Pautex

Démence avancée et fin de vie

Reconnaître les symptômes des patients atteints de démence avancée est une chose, les évaluer et les prendre en charge en est une autre.

Elsbeth Wandeler

Careholder-value, baromètre de la politique de santé

La valeur sociale des soins est inestimable, mais pour qu'elle soit reconnue, un changement radical du système de santé s'impose.

Urs Lüthi

Premiers jalons d'une nouvelle ASI

Dirigeants de l'ASI et professionnels de la base se sont retrouvés pendant deux jours pour poser les jalons de l'ASI du futur.

Cure infirmieristiche, no 3, 2006

Françoise Taillens

Des écoles où il fait bon vivre

En Suisse romande, les infirmières scolaires s'engagent pour que l'école devienne un lieu de vie où bien-être et promotion de la santé figurent au premier plan.

Valérie Gaillard

Les infirmières albanaises sur la voie de l'autonomie

Pendant treize ans, la Haute école de santé de Genève a piloté un projet de coopération destiné aux infirmières en Albanie. Aujourd'hui, les professionnels sur place sont prêts à prendre leur destinée en main.

Christophe Sertori

Paradoxe de la visibilité et de la qualité des soins

Les démarches qualité dans les institutions de soins sont souvent discréditées par les soignants. En y participant activement, ceux-ci pourraient se défaire de leurs a priori négatifs.

Madeleine Joss, Jean-Christophe Miéville

Une aide précieuse dans les situations délicates

L'utilisation des groupes Balint durant la formation est un enrichissement pour les étudiants. L'expérience a été faite à la Haute école de La Source.

Jacques Butel, Christine Maupetit

Une nécessaire clarification

La documentation clinique des soins est une démarche devenue incontournable, destinée à transmettre des informations claires et à faciliter la communication.

Cure infirmieristiche, no 4, 2006

Brigitte Longerich

Les kilos du mal-être

Le nouveau fléau du vingt et unième siècle s'appelle obésité. Dans le monde entier, les responsables cherchent des mesures efficaces pour enrayer cette véritable épidémie qui menace la santé.

Monique Boegli, Elisabeth Cabotte

Des moments d'apaisement et de réconfort

Les douleurs intenses que doivent endurer beaucoup de patients en soins palliatifs peuvent être soulagés par des massages relaxants et bienfaisants. Ceux-ci ouvrent également la porte à une meilleure communication.

Brigitte Longerich

Casser l'engrenage

Une famille maltraitante est elle-même maltraitée par les conditions de vie. Pour briser l'engrenage de la violence, une nouvelle approche, basée sur la proximité et la responsabilisation, s'impose.

Brigitte Longerich

Trop de femmes vivent toujours dans la précarité

Le dernier rapport sur l'égalité des sexes révèle que des progrès ont été faits, mais que les femmes sont toujours défavorisées à bien des égards.

Urs Lüthi

Une haute école spécialisée privée ouvre ses portes

Une haute école privée alémanique propose dès l'automne des études infirmières menant au master et au bachelor. Le commentaire de l'ASI.

Cure infirmieristiche, no 5, 2006

Françoise Tailens

Des collaborateurs des cinq continents

De plus en plus, les équipes de soins réunissent des soignants d'origines culturelles diverses. Pour gérer différences et conflits, les responsables doivent acquérir des compétences transculturelles.

Katia Sautier

Insertion professionnelle des stagiaires migrants

Dans les EMS, les collaborateurs étrangers ne sont pas toujours les bienvenus et les propos racistes ou xénophobes ne sont pas rares. Des mesures d'intégration sensées sont indispensables.

Chantal Deladoey, Jean-Pierre Michaud, Yvan Dürrenberger

Référent de situation, un rôle aux contours flous

Les professionnels qui endossent le rôle de gestionnaire de cas n'ont pas la vie facile. Les responsabilités sont importantes, mais le travail au quotidien n'est pas toujours bien défini, ni suffisamment reconnu.

Brigitte Longerich

Casser l'engrenage

Une famille maltraitante est elle-même maltraitée par les conditions de vie. Pour briser l'engrenage de la violence, une nouvelle approche, basée sur la proximité et la responsabilisation, s'impose.

Mercedes Meugnier-Cuenca

Ciel, où est passé mon soutien-gorge?

Ne plus mettre de soutien-gorge aux résidentes des EMS est une mesure qui va l'encontre du respect de la personne. Les soignants sont appelés à s'insurger contre l'indifférence, la banalisation et le manque d'égards.

Partage

Le film « Faim de vie » de l'infirmier Benjamin Tobler sur la vie en EMS sort dans les salles de cinéma romandes le 7 juin prochain

Récit de soins

Le vaisseau fantôme

Cure infirmieristiche, no 6, 2006

Carlo Colombo

Les scénarios d'urgence sont en place

En Suisse, un plan pandémique national est en place pour pouvoir réagir de manière appropriée si la grippe aviaire devait véritablement menacer l'homme.

Kicki Engström

« Le plus effrayant était l'idée de contaminer ma famille »

Au printemps 2003, la ville de Toronto a été frappée par le SRAS. Dans une ville coupée du monde, les professionnels de la santé ont été confrontés à un défi qui les a profondément marqués.

François Rosselet

Une réalité à expérimenter

La dimension spirituelle est omniprésente dans les soins, même dans les gestes les plus anodins. La spiritualité rend au patient comme au soignant sa dignité fondamentale et son véritable mystère.

Juliette Fioretta

Entre détermination et démotivation

Le système de santé nicaraguayen traverse une crise sans précédent : alors que la population s'appauvrit, les conditions de travail se détériorent. Mais l'espoir ne faillit pas.

ITALIA- INGHILTERRA: PSICHIATRIE A CONFRONTO POLITICHE, LEGGI, PRATICHE

Roberto Chiapparoli e Simona Mandirola

Presentazione di Agostino Pirella

In questo volume, che riteniamo indispensabile per ogni operatore della salute mentale e per chi si deve confrontare comunque con questo tipo di problemi, sono descritti, presentati e discussi con intelligente modalità espositiva, sia i testi legislativi (di cui si dà la versione inglese e la traduzione) che le esperienze psichiatriche e di salute mentale in atto in Gran Bretagna.

Non è la prima volta che le esperienze britanniche e italiane vengono messe a confronto. Ma è la prima volta che viene pubblicata una vasta e puntuale documentazione in Italia sui diversi aspetti dell'assistenza psichiatrica inglese in confronto con le esperienze italiane.

E' da segnalare l'attenzione dedicata nel volume all'approccio del governo Blair, insediatosi per la prima volta nel 1998, alla gestione della salute mentale.

Blair parte dalla considerazione che l'assistenza territoriale ha fallito e che dovrebbe essere sostituita da qualcosa di meglio. La degenza negli ospedali psichiatrici è ammessa e viene accettato l'elettroshock come "trattamento che può salvare la vita".

Risulta tuttavia netto, nell'esperienza inglese diversamente da quella italiana, il tentativo di assegnare un ruolo maggiore e talvolta decisivo all'assistenza sociale nel decidere il destino dei pazienti. Esso però resta affidato ad un giudizio psichiatrico e legale per la valutazione del "rischio di pericolosità" ancora presente nella pratica e nella giurisprudenza inglesi. Tale giudizio, a causa di episodi – comunque isolati – di criminalità legata a gravi disturbi definiti "di personalità", ha orientato il governo inglese e una parte significativa dell'opinione pubblica a considerare necessarie "Unità di alta sicurezza" sulle quali si è aperto un dibattito e si sono sviluppate iniziative critiche. Il cammino per un'Europa senza manicomi appare ancora lungo e difficile.

TOSSICODIPENDENZA E DOLORE

Dolore e castigo

FARMACOLOGIA

Fisiopatologia del dolore e trattamento farmacologico

L'esperienza "dolore" varia tra gli individui e tra le culture; le influenze culturali del dolore modificano a loro volta la sua percezione da parte delle popolazioni di diverse culture. Un dolore eccessivo, o inappropriato, può determinare sintomi depressivi, ansia e una notevole riduzione della qualità della vita

Gian Luigi Gessa

SOCIETA'

Le vie del dolore sono infinite. Curiamo i dolori inutili

La lotta ai dolori non necessari, cioè quei dolori non più eliminabili perché non sono più eliminabili le cause che li hanno determinati, è un dovere morale prima ancora che un dovere civico. Esso ci impone di garantire una migliore qualità della vita nel rispetto della dignità dell'uomo

Domenico Gioffrè

TERAPIA 1

L'uso degli oppiacei nel dolore cronico

L'aver osservato e dimostrato che l'uso appropriato di oppiacei non si accompagna né allo sviluppo di tolleranza all'effetto analgesico né alla comparsa di sintomi tossicomani nei soggetti trattati in maniera adeguata, ha consentito di ridimensionare uno dei tabù della medicina: il timore di rendere tossicodipendenti i pazienti affetti da dolore cronico

Carla Gambarana

TERAPIA 2

Il trattamento del dolore nel tossicodipendente e nell'alcolista

In via generale sia il tossicodipendente che l'alcolista, anche in trattamento farmacologico, pur presentando una probabile alterata percezione dello stimolo doloroso, devono ricevere per il trattamento del dolore una terapia analgesica che non differisce sostanzialmente da quella riservata agli altri pazienti

Buprenorfina e gravidanza: case report

Dati scientifici derivati dalla letteratura internazionale suggeriscono che gli studi, sebbene non estesi, sull'uso della buprenorfina in gravidanza, in Paesi in cui esso è permesso, non hanno evidenziato una maggiore incidenza di effetti dannosi sul prodotto del concepimento, a fronte di una più bassa frequenza di sindrome astinenziale neonatale rispetto al metadone

PROPOSTE - OPINIONI - RIFLESSIONI

Aspetti psicodinamici della correlazione tra personalità e addiction

In realtà le diverse osservazioni fatte, sia in campo psicoanalitico che in quello psichiatrico, hanno portato a escludere l'esistenza di una personalità tossicomana, a favore invece di una concezione della tossicomania come di un fenomeno che sembra porsi in una relazione "possibile" con tutte e tre le strutture psichiche: nevrotiche, borderline, psicotiche

CLINICA 1

HIV e tossicodipendenze

"Due avvenimenti del 1982 chiarirono, assai prima della scoperta dell'HIV, la natura della malattia: cominciarono ad ammalarsi uomini e donne che erano emofilici o che facevano uso di stupefacenti per via venosa"

Paolo Emilio Manconi

FARMACOLOGIA CLINICA

Sostanze d'abuso ed infezione da HIVicodipendenze

"L'abuso di sostanze è un'evenienza comune tra le persone affette dal virus HIV, un suo mancato controllo si associa spesso ad uno scarso risultato della terapia antivirale ed a una peggiore prognosi della malattia stessa"

Francesco Ortu

CLINICA 2

La gravidanza in donne HIV infette: un lieto evento?

"Anche nel nostro Paese è aumentato nelle donne HIV infette il desiderio di avere figli e si è ridotto il ricorso all'interruzione della gravidanza. Del resto le misure preventive contribuiscono ad evitare l'incremento della nascita di bimbi infetti da donne sieropositive"

Alessandra Meloni Milena Tuberi Stefano Guerriero Lucia Floris Maria Elena Cocco Gian Benedetto Melis

EPIDEMIOLOGIA

Epidemiologia dell'infezione da HIV/AIDS nel mondo

"Il numero di persone con infezione da HIV è in costante crescita in tutto il mondo, e le morti per AIDS sono in continuo aumento soprattutto nelle regioni dell'Africa sub-sahariana"

Disturbo bipolare ed abuso di sostanze: implicazioni per gli operatori dei Ser.T.

"La bipolarità degli individui tossicomani è spesso misconosciuta, anche perché ipomania e temperamenti affettivi non sono indagati adeguatamente nella pratica clinica. In realtà, sembrano essere proprio le disposizioni temperamentali e le forme ipomaniacali, piuttosto che i quadri maggiori, a rappresentare i principali fattori di rischio per la predisposizione all'abuso di sostanze"

La conciliazione dei tempi di vita e di lavoro è il tema di questo doppio numero monografico di PSS, a cura di Chiara Crepaldi, con articoli che lo affrontano da prospettive differenti: il mercato del lavoro, le politiche sociali, il privato sociale, l'impresa.

Marina Piazza, in apertura, introduce il tema fissando l'attenzione sui tre principali ambiti che le politiche di conciliazione coinvolgono: le relazioni tra uomini e donne nell'ambito familiare, sottolineando l'importanza di porre sempre al centro il riequilibrio delle responsabilità familiari e professionali di entrambi i coniugi; le politiche aziendali e la resistenza delle imprese a introdurre modalità organizzative capaci di garantire una maggiore flessibilità dei tempi di lavoro; il territorio e il complesso dei servizi erogati dal pubblico, dal privato e dal non profit, che offrono risposte non coordinate, prive di un'azione comune tra assessorati e attori delle politiche.

Segue l'articolo di Oliva e Samek che fa il punto sulle politiche dirette e indirette di conciliazione in Italia; Daniela Loi ricostruisce i più recenti strumenti normativi volti a favorire la conciliazione relativamente da un lato alle previsioni della l. 52/00 (congedi parentali e familiari, misure a sostegno della flessibilità di orario, coordinamento dei tempi della città) e dall'altro alle politiche sociali per la conciliazione contenute nella l. 328/00.

Fellini e Pesce affrontano il tema dei voucher per la conciliazione come strumento di promozione delle pari opportunità nell'ambito dei fondi strutturali, mentre Ruggeri e Lazzarotto presentano l'esperienza di un voucher di conciliazione erogato nell'ambito delle politiche sociali promosso dalla Provincia di Arezzo.

Crepaldi, Dessi e Vanoni riportano i risultati di una ricerca sul fabbisogno di servizi di conciliazione realizzata presso nove grandi aziende della Provincia di Varese e, infine, Pesaresi propone l'analisi di un particolare servizio di conciliazione, quello legato all'accudimento dei bambini con meno di tre anni, presentando le esperienze europee di nidi a domicilio.

Chiude il numero la rubrica mensile "Accadde domani", a cura di A. Gambino.

Prendendo spunto da una situazione concreta, Alessandro Battistella apre il numero affrontando il tema della costituzione di un'Azienda sociale consortile a dimensione provinciale in un territorio caratterizzato da storie di servizi e problematiche sociali particolarmente diversificate.

Subito di seguito, prosegue la rassegna di esperienze regionali significative in tema di programmazione sociale con uno scritto di Anna Rosetti sull'esperienza della Regione Emilia Romagna.

Don Virginio Colmegna e Mariagrazia Guida presentano l'esperienza della Casa della Carità, nata nel maggio 2002 in un quartiere ai confini di Milano, per iniziativa del Cardinale Carlo Maria Martini.

La riproposta di un articolo apparso sulla rivista Social Work nel 1973 è l'occasione, per Gianni del Rio, per affrontare il tema delle professioni di aiuto e delle loro problematiche.

Chiude il numero Cristiana Pessina con un articolo sul delicato tema dell'audizione protetta rivolta a minori vittime di abuso.

Fausto Giancaterina prende spunto da difficili situazioni in cui possono trovarsi i disabili o i loro familiari, che non sanno a quale istituzione rivolgersi in caso di bisogno, per affrontare il tema dell'integrazione fra sociale e sanitario. Gavino Maciocco tratta dell'assistenza ai pazienti cronici nel mondo e presenta importanti tentativi in atto per introdurre radicali innovazioni.

Anna Zenarolla, partendo da una riflessione maturata a seguito dall'analisi di un'esperienza di sperimentazione dell'accreditamento per la gestione di un servizio, si sofferma sull'importanza del ruolo che la formazione in questo contesto può svolgere.

Gabriele Codini propone uno scenario dell'attuale situazione della diffusione dell'Hiv, mentre, in chiusura, Chiara Gabbrielli Salvadori affronta il problema per l'assistente sociale della riservatezza e del segreto professionale.

Questo doppio numero monografico di PSS, curato dal Laboratorio di Politiche sociali del Politecnico di Milano, è incentrato sul tema della pianificazione, programmazione, progettazione, gestione e valutazione delle politiche sociali, con una particolare attenzione alla dimensione locale. Presenta una serie di contributi sul social planning, un nome che identifica nuove funzioni professionali che caratterizzano la programmazione nel sociale. Il numero è diviso in quattro parti: la prima, dedicata agli scenari entro cui si colloca l'intera partita del social planning; la seconda, rivolta a tematizzare alcuni dei passaggi fondamentali nell'attività di social planning, centrali nella costruzione in itinere dell'approccio alle politiche e agli interventi sociali qui proposti; la terza, raccoglie riflessioni attinenti alla costruzione della figura professionale del planner sociale mentre la quarta e ultima parte del numero accoglie la presentazione sintetica di alcune esperienze di social planning.

Prospettive sociali e sanitarie, no 14, anno 36, 2006

Questo numero monografico di PSS è dedicato al fenomeno delle assistenti familiari e al problema della regolarizzazione del loro lavoro, non solo dal punto di vista del contratto e dei contributi ma anche dell'organizzazione in una rete territoriale e della formazione di queste lavoratrici. Il fascicolo contiene contributi di analisi, di riflessione e di tipo più operativo. Sergio Pasquinelli, curatore del numero, introduce il tema analizzando brevemente le varie tematiche aperte in questo campo. I tre contributi di ricerca che seguono si pongono tutti, in modo più o meno esplicito, il tema della qualificazione e della regolarizzazione delle assistenti familiari. Tutte e tre le ricerche hanno un taglio di tipo quantitativo, a differenza degli studi finora condotti nel nostro paese, a prevalente impostazione qualitativa. Seguono interventi legati a specifiche esperienze, con particolare riferimento alla formazione di una figura professionale dal profilo ancora incerto.

La consommation d'alcool interroge chacune et chacun, c'est indéniable. Les praticiens y compris. Lorsqu'un alcoologue croise le regard d'un collègue «pris» le verre à la main, celui-ci prend un air faussement contrit ou cache son verre d'un air gêné en s'excusant ou en se justifiant. Boire de l'alcool n'est pas neutre et comme le rappelait l'écrivain Colette : «malheur à celui qui ne boit pas et à celui qui boit trop». Boire est une compétence sociale qui intéresse plus de 85% de la population suisse consommatrice d'alcool en des quantités fort variables. Qu'on le veuille ou non, l'alcoologie s'imisce dans notre vie quotidienne bi...

Comme le rappelle l'un de nous (Patrice Guex), au-delà des plaintes récurrentes concernant la difficulté à joindre un psychiatre et les longs délais d'attente, la collaboration entre ces deux grandes disciplines s'est beaucoup développée ces dernières années, même s'il reste du travail. Cela touche en particulier l'enseignement, au travers de l'élaboration de guides de traitement, de séminaires et d'ateliers réguliers ou encore d'activités de formation continue ...

Psychiatrie en milieu somatique: de la consultation à la liaison

Edito: Psychiatrie en milieu somatique : de la consultation à la liaison par : P. Guex F. Stiefel A. Andreoli

Ce numéro spécial «psychiatrie de liaison» de la Revue médicale suisse est en grande partie consacré à l'enseignement postgradué et à des instruments employés pour faciliter le transfert de «savoir» et de «savoir-être» vers les disciplines somatiques. Cela reflète l'évolution de la psychiatrie de liaison d'un modèle centré sur la «consultation», dépendante des demandes des médecins somaticiens, vers un concept plus global de «liaison», impliquant non seulement un partenariat pour la clinique et l'enseignement mais aussi des recherches en coopération avec les collègues et soignants d'autres spécialités. L'activité de liaison ...

Enfants surdoués en difficulté : de l'hyperactivité avec déficit attentionnel à la dépression et l'échec scolaire

Article de S. Tordjman

Nous nous sommes intéressés aux enfants surdoués en difficulté devant le nombre d'enfants adressés en consultation pour des troubles du comportement à type d'hyperactivité avec déficit attentionnel, des problèmes scolaires ou dépressifs, et chez lesquels nous avons découvert un haut potentiel intellectuel. Cet article traitera plus particulièrement du trouble déficit de l'attention/hyperactivité (TDAH) observé chez certains de ces enfants, pouvant recouvrir une dépression et entraîner un échec scolaire. Comment interpréter le TDAH chez l'enfant surdoué ? A partir de notre expérience clinique et de la littérature, nous proposons que ces troubles relèvent d'un besoin de stimulations externes et internes. Plusieurs hypothèses s'articulant autour de cette idée seront alors discutées, notamment au regard de leurs implications thérapeutiques.

Un observatoire de la maltraitance envers les enfants : une façon interactive de s'intéresser à cette problématique

Article de C. Voelin F. Nicod J.-J. Cheseaux

Des professionnels issus de domaines divers se penchent depuis la seconde moitié du XXe siècle sur la problématique des mauvais traitements envers les enfants, sans qu'une réelle réflexion commune ne puisse être engagée. L'objectif de «l'Observatoire» est de permettre à ces personnes, qu'elles soient issues du terrain ou de la recherche, de se confronter au sein d'un débat interdisciplinaire constructif afin de pouvoir mieux répondre aux besoins des victimes, des familles et des auteurs.

par : Georges Abraham et Francesco Bianchi-Demicheli

La sexologie possède des caractéristiques propres par rapport à la médecine dans son ensemble. Elle accorde autant d'importance à la problématique soulevée par le plaisir qu'à celle soulevée par la douleur. Elle prend en charge, en principe, autant l'individu qui demande de l'aide que son partenaire sexuel possible, que celui-ci soit réel ou virtuel, qu'il soit en somme tout à fait existant dans la réalité ou qu'il corresponde davantage à une entité souhaitée, voire idéalisée. Bref, la sexologie médicale est une discipline qui donne une importance égale aux aspects objectifs relevant d'un tableau clinique donné et aux aspects subje...

Nous traversons une épidémie d'obésité, nous vivons dans un environnement «obésogène» et personne ne bouge. Nos cousins d'Amérique ont une longueur d'avance sur nous, mais nous suivons leurs traces avec un peu de retard seulement. Pourquoi autant de mépris face à ces patients qui n'ont qu'à moins manger ? «Il n'y a qu'à». C'est si simple, ce n'est qu'une affaire de volonté ! Et bien non, l'obésité est trop souvent la conséquence de traumatismes psychologiques. Les troubles du comportement alimentaire ont besoin d'un traitement adéquat psychologique et les patients d'un soutien adéquat à long terme. Les industries agroalimentaires c...

Le présent numéro «adolescents» de la Revue Médicale Suisse est entièrement consacré à la santé scolaire. Il offre une opportunité de réfléchir aux conséquences de l'évolution que connaît notre société en terme de morbidité actuelle et future des individus et de réfléchir aussi à la manière dont le système éducatif et les structures de soins et de prévention doivent y réagir. Au siècle passé, les activités des services de santé scolaires se concentraient sur le dépistage et les campagnes d'hygiène, destinés à pallier les insuffisances du système de santé. Avec l'amélioration de l'accès aux soins et la densification de l'offre de suivi,...

La population suisse est dorénavant prête à supprimer la fumée dans les espaces clos accessibles au public. Les initiatives, qu'elles viennent des instances politiques (initiatives parlementaires), administratives (services fédéraux et cantonaux de santé publique), non gouvernementales (centres d'information et de prévention – Cipret, Ligues de la santé) ou des citoyens (coalition romande pour une initiative populaire) sont aujourd'hui nombreuses à exiger la protection des non-fumeurs. L'accélération de la prise de conscience dans la population suisse des effets du tabagisme passif surprend beaucoup de personnes. Mais faut-il s'en ...
