Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand, 2000-01-01 Jean-Nicolas-Louis Durand (1760-1834) regarded the Précis of the Lectures on Architecture (1802-5) and its companion volume, the Graphic Portion (1821), as both a basic course for future civil engineers and a treatise. Focusing the practice of architecture on utilitarian and economic values, he assailed the rationale behind classical architectural training: beauty, proportionality, and symbolism. His formal systematization of plans, elevations, and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed. His emphasis on pragmatic values, to the exclusion of metaphysical concerns, represented architecture as a closed system that subjected its own formal language to logical processes. Now published in English for the first time, the Précis and the Graphic Portion are classics of architectural education.

Culture and Imperialism Edward W. Said, 2012-10-24 A landmark work from the author of Orientalism that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from Mansfield Park to Heart of Darkness and Aida. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such

writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

The World Bank's Experience with Post-conflict Reconstruction ,1998-01-01 Clearing landmines, rehabilitating and integrating of excombatants, rebuilding the infrastructure, coordinating aid sources—these are just some of the issues confronting the Bank in post-conflict reconstruction. The explosion of civil conflicts in the post-Cold War world has tested the World Bank's ability to address unprecedented devastation of human and social capital. This study covers post-conflict reconstruction in nine countries, assessing relevant, recent Bank experience. It also presents case-studies for ongoing and future operations, which analyze: 1. the Bank's main strengths or comparative advantages; 2. its partnership with other donors, international organizations, and NGOs; 3. its role in reconstruction strategy and damage and needs assessment; 4. its role in rebuilding the economy and institutions of governance; 5. its management of resources and processes; 6. implications for monitoring and evaluation.

Terra 2008 Leslie Rainer,Angelyn Bass Rivera,David Gandreau,2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

Teaching Writing in the Foreign Language Curriculum Claire Gaudiani,1981

Marketing Identities Through Language E. Martin,2005-11-30 Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.

Royal dictionary, English and French and French and English Charles Fleming,1866

Scientific Babel Michael D. Gordin,2015-04-13 English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And

what can we reconstruct of the experience of doing science in the polyglot past? With *Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Conscripts and Deserters Alan I. Forrest, 1989 Between the outbreak of war with Austria in 1792 and Napoleon's final debacle in 1814, France remained almost continuously at war, recruiting in the process some two to three million frenchmen--a level of recruitment unknown to previous generations and widely resented as an attack on the liberties of rural communities. Forrest challenges the notion of a nation heroically rushing to arms by examining the massive rates of desertion and avoidance of service as well as their consequences on French society--on military campaigns and the morale of armies, on political opinion at home, on the social fabric of local villages, and on the Napoleonic dream of bringing about a coherent and centralized state.

Absorption and Theatricality Michael Fried, 1988-09-15 With this widely acclaimed work, Michael Fried revised the way in which eighteenth-century French painting and criticism are viewed and understood. Analyzing paintings produced between 1753 and 1781 and the comments of a number of critics who wrote about them, especially Dennis Diderot, Fried discovers a new emphasis in the art of the time, based not on subject matter or style but on values and effects.

The Genre of the Book of Revelation from a Source-critical Perspective Frederick David Mazzaferri, 2010-10-13 Die Reihe Beihefte zur Zeitschrift für die neutestamentliche Wissenschaft (BZNW) ist eine der ältesten und renommiertesten internationalen Buchreihen zur neutestamentlichen Wissenschaft. Seit 1923 publiziert sie wegweisende Forschungsarbeiten zum frühen Christentum und angrenzenden Themengebieten. Die Reihe ist historisch-kritisch verankert und steht neuen methodischen Ansätzen, die unser Verständnis des Neuen Testaments befördern, gleichfalls offen gegenüber.

In Defiance of Painting Christine Poggi, 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive

study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.
