The Third Reign of Louis XIV, c.1682-1715 Julia Prest, Guy Rowlands, 2016-12-08 The personal rule of Louis XIV, following on from a long period of royal minority and apprenticeship, lasted 54 years from 1661 to 1715. But the second half of this personal rule has, until recently, received significantly less scholarly attention than the 1660s and 1670s. This has obscured some of the very real changes and developments that occurred between the early 1680s and the mid-1690s, by which time a new generation of younger royals had come to prominence, France was engulfed in international war on a greater scale than ever before, and the king was visibly no longer as vigorous or healthy as he had once been. The essays in this volume take a close look at the way a new set of political, social, cultural and economic dispensations emerged from the mid-1680s to create a different France in the final decades of Louis XIV's reign, even though the basic ideological, social and economic underpinnings of the country remained very largely the same. The contributions examine such varied matters as the structure and practices of government, naval power, the financial operations of the state, trade and commerce, social pressures, overseas expansion, religious dissent, music, literature and the fine arts.

Antiquarianism and the Visual Histories of Louis XIV Robert Wellington, 2017-07-05 Antiquarianism and the Visual

Histories of Louis XIV: Artifacts for a Future Past provides a new interpretation of objects and images commissioned by Louis XIV (1638-1715) to document his reign for posterity. The Sun King's image-makers based their prediction of how future historians would interpret the material remains of their culture on contemporary antiquarian methods, creating new works of art as artifacts for a future time. The need for such items to function as historical evidence led to many pictorial developments, and medals played a central role in this. Coin-like in form but not currency, the medal was the consummate antiquarian object, made in imitation of ancient coins used to study the past. Yet medals are often elided from the narrative of the arts of ancient France, their neglect wholly disproportionate to the cultural status that they once held. This revisionary study uncovers a numismatic sensibility throughout the iconography of Louis XIV, and in the defining monuments of his age. It looks beyond the standard political reading of the works of art made to document Louis XIV's history, to argue that they are the results of a creative process wedded to antiquarianism, an intellectual culture that provided a model for the production of history in the grand siècle.

Time and Ways of Knowing Under Louis XIV Roland Racevskis,2003 This book is a study of the measurement and understanding of time in seventeenth-century Europe, particularly in France. Close readings of literary representations of time in Moliere, Mme de Sevigne, and Mmd de Lafayette are contextualized with historical studies of court life under Louis XIV, the restructuring of the early modern French postal system, and the emergence of new practices of periodical publication, respectively. An epistemological backdrop for these historical and literary studies is provided by an introductory analysis of developments in the science of time measurement under Louis XIV. A concluding section places questions of human temporality in the contemporary context of global environmental concerns.

Louis XIV's Architect Richard Ballard,2023-12-30 This is a study of royal absolutism in a most extreme form in modern European history, and of the nature of Louis XIV's concept of personal glory and of the embodiment of France as a new superpower. It is a study of political ideas expressed in architecture to establish Versailles as the centre of French world power and royal prestige. It is also a personal story, full of social, cultural, and economic history of the period as seen in the life and work of Louis Le Vau, from a humble family of craftsmen, who was a self-taught architect in the early history of the profession, skilled in technical craft skills and even grand design. He was a major contributor to the architectural glories of Paris including the Louvre, Vincennes, Versailles and the College of the Four Nations. And all achieved despite interference from the great magnates of the age like Mazarin and Colbert and constant mind-changing by the King who wanted every feature in the buildings to reflect his concept of personal, royal, prestige. Le Vau was Louis XIV's First Architect from 1654 until his death and disgrace in 1670. The social, cultural, economic and political backdrop is striking with court intrigue, scandal, corruption, luxury, indulgence and the rise of a rich bourgeoisie, but the main thrust of the story concerns Louis XIV and the royal personal ambition, and the work of a stone-cutter's son who became the Sun King's instrument. The study is good on the more technical features of architectural history - reminiscent of Pevsner's marvellous Buildings of England

series.
