**Robert O. Bauer**

**Food and Wine Pairing** Robert J. Harrington, 2007-03-05 The only book that presents food and wine pairing from a culinary and sensory perspective. Demystifying the terminology and methodology of matching wine to food, Food and Wine Pairing: A Sensory Experience presents a practical, user-friendly approach grounded in understanding the direct relationships and reactions between food and wine components, flavors, and textures. This approach uses sensory analysis to help the practitioner identify key elements that affect pairings, rather than simply following the usual laundry list of wine-to-food matches. The text takes a culinary perspective first, making it a unique resource for culinary students and professionals. Food and Wine Pairing: Lays out the basics of wine evaluation and the hierarchy of taste concepts Establishes the foundation taste components of sweet, sour, salty, and bitter in food, and dry, acidity, and effervescence in wine, and looks at how these components relate to one another Discusses wine texture, and the results of their interactions with one another Examines the impact that spice, flavor type, flavor intensity, and flavor persistency have on the quality of wine and food matches Includes exercises to improve skills relating to taste identification and palate mapping Provides a systematic process for predicting successful matches using sequential and mixed tasting methods Gives guidance on pairing wine with foods such as cheese and various desserts, as well as service issues such as training and menu/wine list development Food and Wine Pairing provides students and professionals with vivid and dynamic learning features to bring the matching process to life with detail and clarity. real-world examples include menus and tasting notes from renowned restaurants, as well as Aperitifs or vignettes portraying culinary notables—both individuals and organizations—which set their wine pairings in a complete gastronomic, regional, and cultural context. Culinary students making their initial foray into understanding pairing will appreciate the reader-friendly and comprehensive approach taken by Food and Wine Pairing. More advanced students, instructors, and culinary professionals will find this text to be an unparalleled tool for developing their matching process and honing their tasting instinct.

**Leading the Crimson and Gray** Mark O'English, Tim Steury, William Stimson, Sam Fleischer, Larry Clark, John T. Menard, Buddy Levy, Paul Pitre, Aaron Ngozi Oforlea, Brian Dixon, 2019-04 Washington State University (WSU) is a remarkable place, over the years educating hundreds of thousands, conducting innovative research in a wide variety of disciplines, and earning numerous intercollegiate athletics titles. Originally named The Agricultural College, Experiment Station and School

of Science of the State of Washington, the school first opened on a wintry 1892 morning with six professors. Today, the institution has more than 2,600 faculty positions and annually awards over 7,000 degrees on multiple campuses--now exceeding 260,000 total since its first graduating class of seven. In *Leading the Crimson and Gray*, multiple authors chronicle the lives and legacies of those who served in one of WSU's most visible roles--president. These executives were responsible for raising funds, shaping strategic visions, addressing faculty and student concerns, attending to fiscal issues, and interacting with lawmakers and business leaders. There were early bitter battles over the Pullman location and curriculum. Other eras brought student unrest and social upheaval, wars, protests, and severe economic depression and recession. Their accomplishments were substantial. Early presidents launched the college, expanded the academic program beyond agriculture and science, established general education requirements, and took key steps toward eventual university status. Later presidents supported athletic achievement, vastly strengthened enrollment, obtained favorable legislative budgets and support for a capital construction bond referendum, increased research grants and contracts, completed major construction projects, effectively faced massive state allocation cuts, and won bipartisan state legislative backing for a new medical school. Combined, George W. Lilley, John W. Heston, Enoch A. Bryan, Ernest O. Holland, Wilson M. Compton, C. Clement French, W. Glenn Terrell, Samuel H. Smith, V. Lane Rawlins, and Elson S. Floyd left a legacy that makes the Cougar Nation proud.

**Getting Even** Thomas M. Tripp, Robert J. Bies, 2009-01-27 Tripp and Bies educate employees and managers about the right and wrong ways to deal with workplace conflict, specifically revenge. The authors have amassed dozens of lively stories, insights and counter-intuitive truths to bring to the book. Not only will managers and employees find this information useful and entertaining, but most readers will find applications in their home lives as well as in their work lives. The core argument is that revenge is about justice. Avenging employees are not unprofessional, out-of-control employees; rather, they are victims of offenses who feel compelled to seek justice on their own. The authors address specific questions, such as: What kinds of offenses result in revenge? Why do some victims respond more aggressively to harm than others? What role does the organization play in how victims respond to offenses? What's the best advice for managers who wish to prevent their employees from seeking revenge? Most employees experience the desire for revenge, and are ready to settle their own scores at work when management won't enforce justice. This book offers a model that sequences avengers' thoughts and behaviors, from the beginning of the conflict to its end. The model is grounded in scientific research and organizes disparate findings into a whole.
