La Norme, la ville, la mer Jean-Claude Hélin, Alain Supiot, Yann Tanguy, 2000 Yves Prats a marqué profondément de son empreinte la renaissance de la faculté de droit et des sciences politiques de Nantes à la fin des années soixante. Durant cette période charnière de l'université française, il a posé dans cette ville les bases d'un enseignement et d'une recherche qui saisissent d'abord le droit comme fait de culture et transcendent les clivages institués entre droit privé, droit public et histoire du droit. Hommage lui est rendu dans cet ouvrage par une série de contributions qui portent sur trois de ses domaines d'élection : la théorie de la norme, le droit de l'urbanisme et de l'environnement et le droit maritime.

Tourism and the Creative Industries Philip Long, Nigel D. Morpeth, 2016-05-20 This book focuses on the theoretical, policy and practice linkages and disjunctures between tourism and the creative industries. There are clear and strong intersections between the sectors, for example in the development and application of new and emerging media in tourism; festivals and cultural events showcasing the creative identity of place; tours and place identities associated with film, TV, music and arts tourism; as well as particular destinations being promoted on the basis of their 'creative' endowments such as theatre breaks, art exhibitions and fashion shows. Tourism and the Creative Industries explores a variety of relationships in one volume and offers innovative and critical insights into how creative industries and tourism together contribute to place identity, tourist experience, destination marketing and management. The book is aligned with the sectors that have been

demarcated by the UK Government Department of Culture, Media and Sport as comprising the creative industries: advertising and marketing; architecture; design and designer fashion; film, TV, video, radio and photography; IT, software and computer services; publishing and music; performing and visual arts. The title of this volume demonstrates how the exclusion of tourism from the creative industries is arguably perverse, given that much of the work by destination managers and of private sector tourism is characterised by creativity and innovation. Interdisciplinary research and international context bring a broader perspective on how the creative industries operate in varying cultural and policy contexts in relation to tourism. This book brings together the parallel and disparate inter-disciplinary fields of tourism and the creative industries and will be of interest to students, academics and researchers interested in tourism, creative industries, marketing and management.

Local Energy Autonomy Fanny Lopez, Margot Pellegrino, Olivier Coutard, 2019-04-26 In recent years, interest for local energy production, supply and consumption has increased in academic and public debates. In particular, contemporary energy transition discourses and strategies often emphasize the search for increased local energy autonomy, a phrase which can refer to a diverse range of configurations, both in terms of the spaces and scales of the local territory considered and in terms of what is meant by energy autonomy. This book explores policies, projects and processes aimed at increased local energy autonomy, with a particular focus on their spatial, infrastructural and political dimensions. In doing so, the authors – Sabine Barles, Bruno Barroca, Guilhem Blanchard, Benoit Boutaud, Arwen Colell, Gilles Debizet, Ariane Debourdeau, Laure Dobigny, Florian Dupont, Zélia Hampikian, Sylvie Jaglin, Allan Jones, Raphael Ménard, Alain Nadaï, Angela Pohlmann, Cyril Roger-Lacan, Eric Vidalenc – improve our understanding of the always partial and controversial processes of energy relocation that articulate forms of local metabolic self-sufficiency, socio-technical decentralization and political empowerment. Comprising fifteen chapters, the book is divided into four parts: Governance and Actors; Urban Projects and Energy Systems; Energy Communities; and The Challenges of Energy Autonomy.

Quand la scénographie devient urbaine Emmanuelle Gangloff, 2017 S'appuyant sur l'effervescence dont fait actuellement l'objet le terme de scénographie dans le milieu créatif, ce travail propose d'étudier l'apparition d'une fonction spécifique autour du concept de scénographie urbaine dans la fabrique de la ville contemporaine. En effet depuis les années 1980, dans un contexte d'essor de la ville événementielle, créative et culturelle nous assistons à une multiplication de

propositions artistiques éphémères déployant des dispositifs scénographiques dans l'espace public qui font évoluer les modes d'action des acteurs de la fabrique urbaine (opérateurs culturels, artistes, gestionnaires publics et aménageurs). Entre théâtre et espace public, scène et ville, nous retracerons les origines de la scénographie pour ensuite s'intéresser à la scène nantaise qui est ici considérée comme un laboratoire des différentes formes que peut prendre la scénographie urbaine. En définissant le rôle du scénographe sur un terrain d'intervention spécifique, à savoir l'espace urbain, il s'agit par-là d'identifier un groupe professionnel émergent, les scénographes, au regard de l'évolution de leurs pratiques hors du théâtre. Puis, en resserrant la focale sur un territoire, nous caractérisons plus particulièrement la fonction de scénographie urbaine dans son acception contemporaine traduisant une évolution de la place de la création artistique dans la fabrique urbaine. Plus largement, cette étude met en question la production d'espaces urbains, révélatrice de tension entre nécessité fonctionnelle et conception d'espaces sensibles. Entre fabrique artistique et dynamique de récupération, ce travail nous renseigne sur un mode de faire la ville contemporaine à l'interface entre urbanisme du divertissement et utopie artistique.

Neighbourhoods in Transition Emmanuel Rey, Martine Laprise, Sophie Lufkin, 2021-09-25 This open access book is focused on the intersection between urban brownfields and the sustainability transitions of metropolitan areas, cities and neighbourhoods. It provides both a theoretical and practical approach to the topic, offering a thorough introduction to urban brownfields and regeneration projects as well as an operational monitoring tool. Neighbourhoods in Transition begins with an overview of historic urban development and strategic areas in the hearts of towns to be developed. It then defines several key issues related to the topic, including urban brownfields, regeneration projects, and sustainability issues related to neighbourhood development. The second part of this book is focused on support tools, explaining the challenges faced, the steps involved in a regeneration process, and offering an operational monitoring tool. It applies the unique tool to case studies in three selected neighbourhoods and the outcomes of one case study are also presented and discussed, highlighting its benefits. The audience for this book will be both professional and academic. It will support researchers as an up-to-date reference book on urban brownfield regeneration projects, and also the work of architects, urban designers, urban planners and engineers involved in sustainability transitions of the built environment.

Governance and City Regions Karsten Zimmermann,Patricia Feiertag,2021-12-24 City-regions are areas where the daily journeys for work, shopping and leisure frequently cross administrative boundaries. They are seen as engines of the national economy, but are also facing congestion and disparities. Thus, all over the world, governments attempt to increase problem-solving capacities in city-regions by institutional reform and a shift of functions. This book analyses the recent reforms and changes in the governance of city-regions in France, Germany and Italy. It covers themes such as the impact of austerity measures, territorial development, planning and state modernisation. The authors provide a systematic cross-country perspective on two levels, between six city-regions and between the national policy frameworks in these three countries. They use a solid comparative framework, which refers to the four dimensions functions, institutions and governance, ideas and space. They describe the course of the reforms, the motivations and the results, and consequently, they question the widespread metropolitan fever or resurgence of city-regions and provide a better understanding of recent changes in city-regional governance in Europe. The primary readership will be researchers and master students in planning, urban studies, urban geography, political science and governance studies, especially those interested in metropolitan regions and / or decentralisation. Due to the uniqueness of the work, the book will be of particular interest to scholars working on the comparative European dimension of territorial governance and planning. Nantes Laurent Devisme,2009 Nantes connaît, depuis une dizaine d'années, d'importants changements, tant

organisationnels que relatifs aux territoires urbanisés. Qu'ils soient impulsés par la ville ou la communauté urbaine, les projets urbains incarnent, dans ce contexte, des enjeux multidimensionnels. On se propose ici d'examiner la façon dont s'imbriquent les stratégies, volontés explicitées, intentions politiques et l'ordinaire de l'action sur le terrain : grande et petite fabrique de la ville. Si cette fabrique est intentionnelle, elle ne se limite pas à ce que produisent les pouvoirs publics. Les processus en jeu mis en évidence font apparaître les différentes couches d'intervenants, leurs pouvoirs, instruments et cultures professionnelles à l'œuvre. Le regard des auteurs prétend à autre chose qu'à de la passivité ou de la complaisance en révélant le fond de plan nantais, les routines et les discours officiels, la ville en train de se faire en somme. Ce livre est le premier d'une série de monographies spécifiques à chacune des villes ayant participé au programme Popsu (Plate-forme d'observation des projets et stratégies urbaines).

Growth in a Traditional Society Philip T. Hoffman, 2018-06-05 Philip Hoffman shatters the widespread myth that traditional agricultural societies in early modern Europe were socially and economically stagnant and ultimately dependent on wide-scale political revolution for their growth. Through a richly detailed historical investigation of the peasant agriculture of ancien-régime France, the author uncovers evidence that requires a new understanding of what constituted economic growth in such societies. His arguments rest on a measurement of long-term growth that enables him to analyze the economic, institutional, and political factors that explain its forms and rhythms. In comparing France with England and Germany, Hoffman arrives at fresh answers to some classic questions: Did French agriculture lag behind farming in other countries? If so, did the obstacles in French agriculture lurk within peasant society itself, in the peasants' culture, in their communal property rights, or in the small scale of their farms? Or did the obstacles hide elsewhere, in politics, in the tax system, or in meager opportunities for trade? The author discovers that growth cannot be explained by culture, property rights, or farm size, and argues that the real causes of growth derived from politics and gains from trade. By challenging other widely held beliefs, such as the nature of the commons and the workings of the rural economy, Hoffman offers a new analysis of peasant society and culture, one based on microeconomics and game theory and intended for a wide range of social scientists.

Le Havre 1517-1789 Jean-Baptiste Gastinne, 2016-03-22 Née d'un geste souverain par excellence, au moment où le monde s'élargit, la ville du Havre est la première et la plus réussie des fondations urbaines de l'époque moderne. La décision prise par François Ier en 1517 répond à des besoins précis: protéger les côtes normandes contre les Anglais, servir de base aux navires du roi et d'avant-port au commerce rouennais. Elle fixe les premiers caractères génétiques de l'identité havraise mais elle n'explique pas tout. Le Havre n'est pas le simple produit d'une rente de situation, à l'embouchure de la Seine. La réussite havraise n'a rien de naturel; il ne lui suffit pas d'être inscrite dans la géographie. Elle a aussi une histoire. Et c'est une histoire mouvementée, pleine de rebondissements. Après le choc de la trahison des protestants, qui livrent Le Havre aux

Anglais (1562), et l'aventure ligueuse (1587-1594), qui rompt les liens privilégiés avec la monarchie, les élites catholiques au pouvoir s'efforcent de construire la communauté havraise dans une double fidélité au roi et à Dieu. La révocation de l'édit de Nantes, les guerres, les crises et les mutations de la fin du règne de Louis XIV changent cependant la donne. Au XVIIIe siècle, l'idéal communautaire se heurte à une immigration croissante autant qu'à l'essor d'un capitalisme maritime qui bouleverse les rapports sociaux.

La France de 1815 à 1848 Jean-Claude Caron, 2013-08-21 Ce manuel aborde l'histoire de la France à l'époque de la monarchie constitutionnelle sous ses aspects politique, social et culturel, ainsi que la politique extérieure, modifiant sensiblement l'approche traditionnelle des années 1815-1848 ; elles sont en effet essentielles et novatrices dans l'histoire politique : mise en place du jeu parlementaire, qualité des débats, importance des questions sociétales soulevées, élaboration d'idéologies. Période essentielle aussi pour l'histoire sociale : « découverte » de la question sociale, revendications ouvrières, lutte pour le droit de grève ou le droit d'association. Période clé, enfin, pour l'histoire culturelle avec le romantisme, le plus fort mouvement littéraire, artistique, scientifique, philosophique que l'Europe et la France aient connu depuis la Renaissance. Manuel de sociologie de l'environnement Collectif, 2012-07-13T00:00:00-04:00 Cet ouvrage présente de manière claire et accessible les concepts et les travaux originaux qui ont été élaborés depuis 30 ans dans le monde francophone et offre un large aperçu de la production internationale en sociologie de l'environnement. Il propose une mise en perspective des principaux enjeux méthodologiques et épistémologiques soulevés par l'émergence des problèmes d'environnement dans les sociétés industrielles avancées, tout en exposant des recherches empiriques à propos d'enjeux classiques, notamment la gestion des ressources naturelles, les controverses environnementales, le gouvernement territorial. Alors qu'il existe, dans le monde anglo-saxon, plusieurs ouvrages de type « manuel » ou « état des savoirs » de sociologie de l'environnement, aucun ouvrage généraliste de ce type n'était encore disponible en langue française. Cet ouvrage entend combler cette lacune. Pour cela, le comité éditorial, issu du réseau thématique Sociologie de l'environnement et des risques de l'Association française de sociologie, a sollicité des chercheurs parmi les plus reconnus dans leur domaine. Cet ouvrage permet de consolider la légitimité scientifique de ce domaine de recherches et offre à un large public d'étudiants, de professionnels et de citoyens intéressés, des éléments de réflexion sur le changement de mode de développement qu'appelle la prise en compte de la

question environnementale.

Nouveaux musées, nouvelles ères urbaines, nouvelles... Maria Gravari-Barbas, Edith Fagnoni, 2015-11-24T00:00:00-05:00
Du musée traditionnel, parvenu jusqu'à nous sans grande transformation depuis le xix^e siècle, au musée événement instrumentalisé par les politiques urbaines et l'économie touristique, les musées connaissent une transformation profonde depuis une trentaine d'années. La fin du xx^e siècle et le début du xxⁱe ont vu naître un nouveau modèle d'établissement muséal, impulsé par un changement d'enjeu, un changement d'échelle urbaine et le développement inédit des mobilités touristiques. Le musée est véritablement devenu acteur du tourisme. Or, si le musée produit du tourisme, il n'en est pas moins vrai que le tourisme produit du musée. L'objectif de cet ouvrage est d'étudier cette relation complexe et ces rapports multiformes entre musée, tourisme et ville.

Les territoires de l'autonomie énergétique Fanny Lopez, Margot Pellegrino, Olivier Coutard, 2019-09-01 L'intérêt pour la production, l'approvisionnement et la consommation d'énergie locale grandit dans les débats universitaires et publics. Les discours et les stratégies de transition énergétique mettent souvent l'accent sur la recherche d'une plus grande autonomie énergétique, expression qui se réfère à des configurations diverses, tant en termes d'espaces (urbains, ruraux ou périphériques) et d'échelles qu'en termes politiques. Les territoires de l'autonomie énergétique explore les liens entre les formes de relocalisation (production et consommation d'énergie), les jeux d'acteurs sous-jacents et les usages de l'énergie afférents, ainsi que les interdépendances entre infrastructures de petite et de grande échelles. Cet ouvrage explicite et analyse des processus souvent partiels et controversés de la relocalisation énergétique qui articulent des formes d'autosuffisance métabolique locale, de décentralisation socio-technique et de responsabilisation politique, et se concentre sur les acteurs comme sur les projets urbains et communautés énergétiques, avant d'aborder les défis de l'autonomie énergétique.

Le nouvel esprit de l'urbanisme, entre scènes et coulisses Pauline Ouvrard, 2016 La posture initiale est celle du travailleur scientifique immergé dans le monde social - ici le monde de l'urbanisme - au prétexte d'un contrat CIFRE qui confère à l'enquêtrice le statut d'architecte-urbaniste à l'agence d'urbanisme de Saint-Nazaire. L'exploration de cette « boîte noire » est le point de départ d'une enquête multi-située entre scènes et coulisses, observations et interactions, discours et pratiques et où le chercheur établi met à l'épreuve l'hypothèse de l'immersion et de l'urbanisme descriptif pour renouveler les savoirs sur l'action urbanistique. La thèse rend compte des activités quotidiennes d'une équipe de techniciens impliqués dans la production du territoire, à travers leurs trajectoires et leurs productions. Par l'expérimentation de différentes formes d'écriture, l'enquêtrice dévoile l'ordinaire du travail en agence : modes de faire, outils et méthodes, lutte des places, pluralité des rôles et positions entre technique et politique. Retracer l'histoire de l'agence permet d'analyser la manière dont la

structuration d'un milieu accompagne les mutations de la fabrique urbaine à travers l'émergence d'un « urbanisme de management et d'animation » et d'un « urbanisme fictionnel ». L'enquête se déploie ensuite hors-les-murs et concentre son analyse sur la prospective territoriale, instrument socio-technique. Saisir la fabrique urbaine, au prisme de son activité prospective, donne à voir la manière dont la convergence de trajectoires et d'intérêts dessine un réseau où circulent et s'échangent des modèles et « bonnes » pratiques, entre échelles de territoire et mondes de l'urbanisme. Ce travail identifie l'activité de mise en récit et d'interprétation comme une pratique spécifique de l'urbanisme. La prendre au sérieux permet de caractériser un « nouvel esprit de l'urbanisme » en tension entre performance et évaluation, communication et contrôle, animation et gestion.

La géographie de la France : les nouvelles dynamiques spatiales du territoire Dalila Messaoudi, Cécile Michoudet, 2019-08-13 Dans le champ des sciences sociales, la géographie joue un rôle particulier et important : expliquer le monde à travers l'interprétation de la combinaison territoriale des phénomènes sociaux, et ceci en mobilisant des échelles d'observation différentes. Cet ouvrage au sous-titre évocateur, *La géographie de la France : les nouvelles dynamiques spatiales du territoire*, rassemble des travaux récents qui analysent les mutations du territoire national français. Derrière cette envie de mettre en lumière certains des changements récents qui se manifestent sur le territoire, se dissimule en réalité l'ambition de mettre en évidence le fait que la France est « en mouvement », qu'elle est dynamique ; changeante, et que, loin d'être passive, elle fait preuve de grandes capacités d'initiative et d'adaptation face aux mutations contemporaines que traverse le monde. Cet ouvrage n'est pas un manuel classique : il vise à transmettre aux étudiants des travaux scientifiques centrés sur quelques-unes des évolutions les plus saillantes de la géographie de la France. En plus des recherches contemporaines, cet ouvrage propose des éclairages méthodologiques sur l'exercice de la dissertation, avec quelques sujets traités. Il constitue ainsi un outil de travail pour les étudiants et les candidats aux concours, pour qui la géographie de la France est au programme ; en outre, il offre des pistes de réflexion à tous ceux et toutes celles qui s'intéressent aux dynamiques territoriales françaises.

Arts et cultures de Bretagne : Un millénaire André Mussat, 1994-12-31T23:00:00+01:00 André Mussat a totalement

renouvelé la connaissance de l'art de la Bretagne. Cet ouvrage le prouve. Rien n'a échappé à la pertinence de son regard : chapelle, château, bourg, maison paysanne, cathédrale, vitraux, orfèvrerie, sculpture ou mobilier. Avec lui, nous découvrons la diversité des cultures et mentalités de l'ensemble de cette province : de la Haute-Bretagne comme de la Basse-Bretagne. Des idées-forces s'imposent : l'importance du milieu ducal, le rôle des marchands de la ville, l'originalité du monde paysan ou marin. Une prodigieuse richesse ! Surtout, André Mussat, le premier, montre que la Bretagne fut perméable aux influences extérieures, et sut s'en nourrir pour créer un art qui lui soit propre. Une mise en perspective et une synthèse magistrale menée avec rigueur, écrite avec passion. Un voyage exaltant dans le passé, pour mieux comprendre la Bretagne d'aujourd'hui.
