Time On My Hands Giorgio Vasta, 2013-06-18 Palermo, Sicily, 1978. The Christian Democrat leader Aldo Moro has just been kidnapped in Rome by members of the notorious Red Brigades. Two months after his disappearance on 9th May, Moro is found dead in the boot of a car. A trio of eleven-year-old schoolboys, Nimbo, Raggio, and Volo, avidly follow the news of the abduction as their admiration for the brigatisti grows. When the boys themselves resolve to abduct a classmate and incarcerate him in a makeshift 'people's prison', the darkness within their world, and the world of the novel, becomes all-pervasive. A vivid and hellish description of Sicily in the late seventies, Time on my Hands is an unforgettable novel from a significant new voice in Italian fiction.

The May 1968 Events in France Keith A. Reader, Khursheed Wadia, 2016-07-27 The multiple impact of the May 1968 events in France is here reviewed and analysed, initially through a narrative account of the events themselves and then through a systematic survey of the various manners in which they have been interpreted and reproduced in France. This covers successively political, social/sociological, and cultural texts - first-hand accounts along with works by political activists and academic social scientists - before moving to a consideration of fictional works (novels and feature films) dealing with or set during the events.

The Spirit of the Counter-Reformation H. Outram Evennett,2008-09-04 Outram Evennett was a university lecturer in history at Cambridge and a Fellow of Trinity College. This book, based on his Birkbeck Lectures of 1951, represents some twenty years' work on the sources of the Counter-Reformation. Evennett did not live to complete his task, but he has provided a remarkable synthesis of the vast European literature on this subject. His method was to isolate the special and positive characteristics of the Counter-Reformation and to account for them in relation to the environment in which they developed. This approach is highly original; it sees in the spirit of the Counter-Reformation an attempt not to check but to extend and come to terms with the more individualistic and modern environment in which the Catholic Church found itself. The Jesuits are treated as agents of this change. Dr John Bossy has edited these lectures for publication and added a

Postscript, analysing some of the problems raised in the years since the lectures were delivered. Professor David Knowles pays tribute to Evennett's memory in a Foreword.

Arabic Administration in Norman Sicily Jeremy Johns,2002-10-07 In the late eleventh century, Sicily - originally part of the Islamic world - was captured by Norman, French and Italian adventurers, led by Roger de Hauteville. For the next 150 years, Roger and his descendants ruled the island and its predominantly Arabic-speaking Muslim population. Jeremy Johns' 2002 book represents a comprehensive account of the Arabic administration of Norman Sicily. While it has generally been assumed that the Normans simply inherited their Arabic administration from the Muslim governors of the island, the author uses the unique Sicilian Arabic documents to demonstrate that the Norman kings restructured their administration on the model of the contemporary administration of Fatimid Egypt. Controversially, he also suggests that, in doing so, their intention was not administrative efficiency but the projection of their royal image. This is a compelling and accessible account of the Norman rulers and how they related to their counterparts in the Muslim Mediterranean.

Political Scandal John B. Thompson,2013-04-25 Political scandals have become a pervasive feature of many societies today. From Profumo to the cash-for-questions scandal, from Watergate to the Clinton-Lewinsky affair, scandals have come to play a central role in politics and in the shaping of public debate. What are the characteristics of political scandals and why have they come to assume such prominence today? What are the social and political consequences of the preoccupation with political scandal in the public domain? In this major new book Thompson develops a systematic and wide-ranging analysis of the phenomenon of political scandal. He shows that the rise of political scandal is linked to the changes brought about by the development of communication media, which have transformed the nature of visibility and altered the relations between public and private life. He analyses the characteristics of scandals as mediated events and he explains why mediated scandals in the political field have become increasingly prevalent in recent years. Distinguishing between three basic types of political scandal, Thompson reconstructs the development of sex scandals, financial scandals and what he calls 'power scandals' in Britain and the United States, showing how scandals unfold and how they form part of distinctive political cultures of scandal. In the final chapter, Thompson develops an original theoretical account of political scandal and its consequences which highlights the connections between scandal, reputation and trust. This book is a path-breaking analysis of a troubling phenomenon which has become a central feature of public life in our societies today. It will be of great interest

to students of sociology, politics, and media and cultural studies. It will also appeal to a wider readership interested in social and political issues.

Studies on the Derveni Papyrus, Volume II Glenn W. Most, 2022-09-30 *Studies on the Derveni Papyrus, volume II* brings together two new editions of the first fragmentarily extant columns of the Derveni Papyrus and seven scholarly articles devoted to their interpretation. The Derveni Papyrus is by far the most important textual discovery of the 20th century regarding early Greek philosophy, religion, exegetical theory and practice, linguistic ideas, and a host of other areas and issues. But the editorial and interpretative history of this extraordinary document has been very checkered. While the interpretation of the better preserved later columns is still highly controversial in many regards, at least the text of those columns has by and large found a scholarly consensus; but the editorial and interpretative situation with the worse preserved first columns is quite different. This volume offers not one but two editions of the first columns, by Richard Janko and by Valeria Piano, given that it is not currently possible to agree upon a single edition; and it explains clearly and in detail the papyrological problems and doubts that lead to these two editions, making it possible for readers (even non-papyrologists) to form their own informed judgment about the most likely readings to be adopted. Furthermore, it contains a number of articles by leading scholars on the Derveni Papyrus, above all offering original solutions to the question of the relation between the earlier and the later columns, but also providing analysis and interpretation of other, related problems.

Pilgrimage Jonathan Sumption, 2011-07-07 In a fascinating work of history, Jonathan Sumption brings alive the traditions of pilgrimage prevalent in Europe from the beginning of Christianity to the end of the fifteenth century. Vividly describing such major destinations as Jerusalem, Rome, Santiago de Compostela and Canterbury, he examines both major figures - popes, kings, queens, scholars, villains - and the common people of their day. With great sympathy he evokes their achievements and failures, and addresses the question of what motivated such extraordinary quests.

Theory of the Novel Guido Mazzoni,2017-01-02 In his theory of the novel, Guido Mazzoni explains that novels consist of stories told in any way whatsoever about the experiences of ordinary men and women who exist as contingent beings within time and space. Novels allow readers to step into other lives and other versions of truth, each a small, local world, absolute in its particularity.

Geography and Revolution David N. Livingstone,Charles W. J. Withers,2010-08-15 A term with myriad associations, revolution is commonly understood in its intellectual, historical, and sociopolitical contexts. Until now, almost no attention has been paid to revolution and questions of geography. Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations. David N. Livingstone and Charles W. J. Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions. Here, scientific revolutions—Copernican, Newtonian, and Darwinian—ordinarily thought of as placeless, are revealed to be rooted in specific sites and spaces. Technical revolutions—the advent of print, time-keeping, and photography—emerge as inventions that transformed the world's order without homogenizing it. Political revolutions—in France, England, Germany, and the United States—are notable for their debates on the nature of political institutions and national identity. Gathering insight from geographers, historians, and historians of science, Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature, shape, and location of revolutions.

The Duel in European History Victor Kiernan,2016-07-15 For centuries, duelling played an integral role in the preservation of the aristocratic order in Europe, defying attempts by both church and state to ban the practice. Moreover, the romance and drama of the duel has made it an enduring fixture in films, literature, and the theatre. In *The Duel in European History*, renowned historian Victor Kiernan writes with his characteristic wit and insight of duelling's evolution from its medieval origins - when it was regarded as a badge of rank - to the early twentieth century, by which time it was

seen as an irrational anachronism. In doing so, he shows how the duelling tradition was something unique to Europe and its colonies, and, in its contribution to the development of the officer corps, played a key part in shaping European military power. Drawing on a vast range of historical and cultural sources, this is the definitive account of a violent ritual that continues to fascinate even today.

ANNO 2023 LA GIUSTIZIA OTTAVA PARTE ANTONIO GIANGRANDE, Antonio Giangrande, orgoglioso di essere diverso. ODIIO OSTENTAZIONE, IMPOSIZIONE E MENZOGNA. Nella vita di ognuno due cose sono certe: la vita e la morte. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Gli animali, da sé, per indole emulano ed imitano, imparando atteggiamenti e comportamenti dei propri simili. Senonché sono proprio i simili, a difesa del gruppo, a inculcare nella mente altrui il principio di omologazione e conformazione. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare. Tu esisti se la tv ti considera. I Fatti son fatti oggettivi naturali e rimangono tali. Chi conosce i fatti si chiama esperto ed esprime pareri. Chi non conosce i fatti esprime opinioni e si chiama opinionista. Le opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, in TV diventano testimonianze. Ergo: Fatti. Con me i pareri e le opinioni cangianti, contrapposte e in contraddittorio, diventano fatti. Con me i fatti, e la Cronaca che li produce, diventano Storia. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Building for Eternity C.J. Brandon,R.L. Hohlfelder,M.D. Jackson,J.P. Oleson,2014-08-29 One marker of the majesty of ancient Rome is its surviving architectural legacy, the stunning remains of which are scattered throughout the circum-Mediterranean landscape. Surprisingly, one truly remarkable aspect of this heritage remains relatively unknown. There exists beneath the waters of the Mediterranean the physical remnants of a vast maritime infrastructure that sustained and connected the western world's first global empire and economy. The key to this incredible accomplishment and to the survival of structures in the hostile environment of the sea for two thousand years was maritime concrete, a building material invented and then employed by Roman builders on a grand scale to construct harbor installations anywhere they were needed, rather than only in locations with advantageous geography or topography. This book explains how the Romans built so successfully in the sea with their new invention. The story is a stimulating mix of archaeological, geological, historical and chemical research, with relevance to both ancient and modern technology. It also breaks new ground in bridging the gap between science and the humanities by integrating analytical materials science, history, and archaeology, along with

underwater exploration. The book will be of interest to anyone interested in Roman architecture and engineering, and it will hold special interest for geologists and mineralogists studying the material characteristics of pyroclastic volcanic rocks and their alteration in seawater brines. The demonstrable durability and longevity of Roman maritime concrete structures may be of special interest to engineers working on cementing materials appropriate for the long-term storage of hazardous substances such as radioactive waste. A pioneering methodology was used to bore into maritime structures both on land and in the sea to collect concrete cores for testing in the research laboratories of the CTG Italcementi Group, a leading cement producer in Italy, the University of Berkeley, and elsewhere. The resulting mechanical, chemical and physical analysis of 36 concrete samples taken from 11 sites in Italy and the eastern Mediterranean have helped fill many gaps in our knowledge of how the Romans built in the sea. To gain even more knowledge of the ancient maritime technology, the directors of the Roman Maritime Concrete Study (ROMACONS) engaged in an ambitious and unique experimental archaeological project Ð the construction underwater of a reproduction of a Roman concrete pier or pila. The same raw materials and tools available to the ancient builders were employed to produce a reproduction concrete structure that appears to be remarkably similar to the ancient one studied during ROMACONS's fieldwork between 2002-2009. This volume reveals a remarkable and unique archaeological project that highlights the synergy that now exists between the humanities and science in our continuing efforts to understand the past. It will quickly become a standard research tool for all interested in Roman building both in the sea and on land, and in the history and chemistry of marine concrete. The authors also hope that the data and observations it presents will stimulate further research by scholars and students into related topics, since we have so much more to learn in the years ahead.

Agenda-setting Dynamics in Canada Stuart Neil Soroka, 2002 Why do public issues like the environment rise and fall in importance over time? To what extent can the trends in salience be explained by real-world factors? To what degree are they the product of interactions between media content, public opinion, and policymaking? This book surveys the development of eight issues in Canada over a decade -- AIDS, crime, the debt/deficit, the environment, inflation, national unity, taxes, and unemployment -- to explore how the salience of issues changes over time, and to examine why these changes are important to our understanding of everyday politics. Agenda-Setting Dynamics in Canada offers one of the first empirical analyses of the interaction of the media, the public, and policymakers in Canada and, more generally, makes an important contribution to the study of political communications and policymaking well beyond the Canadian context.

Crime, Society and the Law in Renaissance Italy Trevor Dean, K. J. P. Lowe, 1994-04-14 Drawing on a wide body of

internationally-renowned scholars, including a core of Italians, this volume focuses on new material and puts crime and disorder in Renaissance Italy firmly in its political and social context. All stages of the judicial process are addressed, from the drafting of new laws to the rounding-up of bandits. Attention is paid both to common crime and to more historically specific crimes, such as sumptuary laws. Attempts to prevent or suppress disorder in private and public life are analysed, and many different types of crime, from the sexual to the political and from the verbal to the physical, are considered. In sum the volume aims to demonstrate the fundamental importance of crime and disorder for the study of the Italian Renaissance. It is the only single-volume treatment available of the subject in English. Other books have studied crime in a single city, or single types of crime, but few have presented a cross-section of articles which deploy diverse methodological approaches in material from many parts of the peninsula.

The Medieval Alexander George Cary, 2009-02-12 Many books were written in the Middle Ages about Alexander the Great and still more books have been written about those books in the last hundred years. In this classic study of the medieval Alexander, first published in 1956, George Cary approached the problem from an altogether different angle, using material which none of his predecessors had exploited. He asked himself the simple question: What did people really think about Alexander in the Middle Ages? The resultant answers proved various and unexpected, changing from age to age and from group to group. Published posthumously, Cary's study was edited by D. J. A. Ross, who corrected certain details, added some footnotes and included an additional section on the *Histoire ancienne jusqu'a Cesar*. To this were also added a number of illustrative plates and an appendix on the origins of the Greek Alexander Romance.

Castellani and Italian Archaeological Jewelry Susan Weber Soros, Stefanie Walker, Bard Graduate Center for Studies in the Decorative Arts, 2004-01-01 During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the

family's involvement in the cultural and political life of their city and country.

The Art of Falconry, by Frederick II of Hohenstaufen Frederick II (Holy Roman Emperor), Casey Albert Wood, Florence Marjorie Fyfe, 1961 *De Arte Venandi cum Avibus* was written shortly before the year 1250 by Frederick II, Holy Roman Emperor, King of Sicily and Jerusalem, in whose court, with its remarkably cosmopolitan and highly intellectual life, may be found the real beginning of the Italian Renaissance. In spite of its title, it is far more than a dissertation on hunting. There is a lengthy introduction dealing with the anatomy of birds, an intensely interesting description of avian habits, and the excursions of migratory birds. Indeed, this ancient book has long been recognized as the first zoological treatise written in the critical spirit of modern science. The sumptuous volume now in hand is, however, the first translation into English of the complete text, originally divided into a prologue and six books. Together, the translators and editors, have at last made available this classic work and have adorned it with notes, comments, bibliographies, and glossary. They have produced a work of great value to zoologists--especially the ornithologist--and also to everyone interested in the history of science and in medieval art and letters.

Fashioning Identities in Renaissance Art Mary Rogers, 2019-06-04 Originally published in 2000. *Fashioning Identities* analyses some of the different ways in which identities were fashioned in and with art during the Renaissance, taken as meaning the period c.1300-1600. The notion of such a search for new identities, expressed in a variety of new themes, styles and genres, has been all-pervasive in the historical and critical literature dealing with the period, starting with Burckhardt, and it has been given a new impetus by contemporary scholarship using a variety of methodological approaches. The identities involved are those of patrons, for whom artistic patronage was a means of consolidating power, projecting ideologies, acquiring social prestige or building a suitable public persona; and artists, who developed a distinctive manner to fashion their artistic identity, or drew attention to aspects of their artistic personality either in self portraiture, or the style and placing of their signature, or by exploiting a variety of literary forms.
